Refuge System Administration Act, as amended by the National Wildlife Refuge System Improvement Act (16 U.S.C. 668dd *et seq.*), we issue this supplementary document. The Environmental Protection Agency will publish similar notification of this action in the **Federal Register**.

Background

On February 24, 2014, we issued an advance notice of proposed rulemaking (ANPR) (79 FR 10080) to assist us in developing a proposed rule on managing activities associated with non-Federal oil and gas development on lands and waters of the National Wildlife Refuge System (NWRS). Non-Federal oil and gas development refers to oil and gas activities associated with any private, state, or tribally owned mineral interest where the surface estate is administered by the Service as part of the Refuge System. The ANPR had a 60-day comment period, ending April 25, 2014. On June 9, 2014, we reopened the comment period for another 30 days, ending July 9, 2014 (79 FR 32903). The ANPR requested the public to focus their comments on seven topics identified as major areas of concern: (1) Plans of Operations and Special Use Permits; (2) Operating Standards; (3) Financial Assurances; (4) Access Fees; (5) Noncompliance; (6) Existing Operations; and (7) Impacts from the Proposed Rulemaking.

We published a proposed rule on December 11, 2015 (80 FR 77200), to revise the regulations governing the exercise of non-Federal oil and gas rights located within NWRS units, and we announced the availability of a draft EIS. The comment period closed February 9, 2016. We now announce the availability of the FEIS.

The FEIS evaluates the impacts of three alternatives, including the following alternative elements:

- Requirement that oil operators proposing new oil and gas development (e.g., drilling a well) obtain an operations permit.
- Requirement of financial assurance (bonding). Financial assurance would be equal to the reasonable estimated cost of site reclamation.
- Requirement that all operations, regardless of status, obtain a reclamation permit (including bonding) once that operation ceases to be economically productive.
- Improving enforcement authority by assimilating State oil and gas laws and regulations. Law enforcement staff would have authority to write citations for noncompliance with State regulations, primarily State regulations addressing surface impacts.
