

claims of third-party certification are truthful and not misleading.

As a policy matter, prior to issuing this guidance document, FSIS has not allowed the use of the terms “genetically modified organism” or “GMO” in negative claims. FSIS has allowed the use of the terms “genetically modified organism” or “GMO” on product labels or labeling only if the name of the third-party certifying organization contains these terms (e.g. “Non-GMO Project”). However, recent legislation was enacted (Pub L 114–216) requiring the Secretary of Agriculture to develop and implement a mandatory national bioengineered food disclosure standard within 2 years. This legislation also addresses negative claims, providing that “a food may not be considered to be ‘not bioengineered’ or ‘non-GMO’, or any other similar claim describing the absence of bioengineering in the food solely because the food is not required to bear a disclosure that the food is bioengineered under this subtitle.” (Pub. L. 114–216, section 294(c)). Therefore, FSIS has reconsidered its position and will allow the use of the terms “genetically modified organism” or “GMO” in negative claims provided that the label or labeling is otherwise truthful and not misleading.

Effective immediately, FSIS will begin approving negative claims for meat, poultry and egg products that do not contain bioengineered ingredients or that are derived from livestock that do not consume bioengineered feed and that contain the terms “genetically modified organism” or “GMO”. In evaluating such claims, FSIS will utilize the definition of “bioengineering” in Public Law 114–216. In that law, the term “bioengineering” refers to a food that contains genetic material that has been modified through in vitro recombinant deoxyribonucleic acid (DNA) techniques and for which the modification could not otherwise be obtained through conventional breeding or found in nature.

Consistent with past practice, FSIS will continue to allow the use of synonymous terms such as “genetically engineered.” If FSIS has approved an organic claim on the product label, establishments may add an applicable negative claim of the kind discussed in the guidance.

FSIS encourages companies to follow this guidance. This guidance represents FSIS’s current thinking, and FSIS welcomes comment on this compliance guidance and will update it as necessary to reflect comments received and any additional information that becomes available.
