Any selected industry collaborator, depending on the terms of the CRADA, would likely benefit by acquiring:

2. Pre-published knowledge of AdFMD vaccine performance during the field trial, as compared to the current inactivated FMD vaccines;

3. Pre-published knowledge of the ELISA diagnostic performance during the field trial;

4. Understanding of how the AdFMD vaccine may be used with a companion diagnostic test to better plan and execute FMD control and eradication strategies on the local, regional and national levels; and

5. Unique perspectives to better leverage existing public-public partnerships that will focus corporate stewardship toward more cost effective FMD control strategies associated with the United Nations Food and Agriculture Organization (FAO) related to the FMD Progressive Control Programme.

Period of Performance

The CRADA will be in effect for 5 years or 60 months from the effective date of the agreement.
