Nuclear Regulatory Commission

[Docket No. 03038199; EA-15-230; License No. 29-31396-01; NRC-2016-0212]

In the Matter of Tetra Tech EC, Inc.

Confirmatory Order

(Effective Immediately)

I

Tetra Tech EC, Inc. (TtEC) is the holder of service provider License No. 29-31396-01 issued by the U.S. Nuclear Regulatory Commission (NRC) pursuant to Parts 30, 40, and 70 of Title 10 of the *Code of Federal Regulations* (10 CFR) on March 2, 2010, and amended on January 28, 2015. The license authorizes the operation of Tetra Tech EC, Inc. in accordance with conditions specified therein. TtEC is headquartered in Morris Plains, New Jersey.

This Confirmatory Order is the result of an agreement reached during an Alternative Dispute Resolution (ADR) mediation session conducted on September 7, 2016. The violation as documented in the NRC letter dated July 28, 2016 (ML16210A228),¹ to TtEC

occurred sometime between November 11, 2011, and June 4, 2012. As of the date of the issuance of this Confirmatory Order, the NRC is not aware of any subsequent willful violations of NRC regulations by TtEC employees since June 4, 2012. TtEC remains in good standing with respect to the terms and conditions of its NRC license.

II

On April 29, 2014, the NRC Office of Investigations (OI) began an investigation (OI Case No. 1-2014-018) of TtEC activities at the U.S. Navy's Hunters Point Naval Shipyard (HPNS). The investigation was conducted to determine whether employees of TtEC deliberately falsified soil sample surveys from the area referred to as 'Parcel C' at HPNS in San Francisco, California. Based on the evidence developed during its investigation, OI substantiated that a Radiation Control Technician (RCT) and a Radiation Task Supervisor (RTS) deliberately falsified soil sample records by taking soil samples from areas not designated as part of the target sample area and by completing chain-of-custody forms with inaccurate information. The NRC completed its investigation on September 15, 2015.

In a letter to TtEC dated February 11, 2016, (ML16042A074) the NRC concluded that based on the evidence developed during the investigation, one apparent violation was identified and was being considered for escalated enforcement action in accordance with the NRC Enforcement Policy. The apparent violation involved TtEC's failure to make or cause to be made, surveys of areas that were reasonable to evaluate concentrations and potential radiological hazards of residual radioactivity in accordance with 10 CFR 20.1501(a). In response to the NRC's letter, TtEC provided two written responses in letters dated March 15, 2016 (ML16090A220) and March 22, 2016, (ADAMS Accession No. ML16090A318).

In the July 28, 2016, letter, the NRC issued a Severity Level III Notice of Violation (NOV) and a \$7,000 Proposed Civil Penalty to TtEC. In response to the NRC's letter, TtEC requested the use of the NRC's ADR process to resolve the issue.

On September 7, 2016, the NRC and TtEC met in an ADR session mediated by a professional mediator, arranged through Cornell University's Institute on Conflict Resolution. ADR is a process in
