

appointed for the Committee leadership. The Committee structure has been expanded to include *ex-officio* representation from the Department of Veterans Affairs (VA). The VA has the largest conglomerate of hospitals in the United States. The agency has responsibility for the largest patient population that uses the largest quantity of blood and tissue products in the United States. Therefore, it was determined that involvement of the VA would be beneficial to the ACBTSA for ensuring that the Committee properly addresses current issues and concerns regarding blood and tissue safety and availability.

On October 5, 2016, the new charter for the ACBTSA was approved by the Secretary of Health and Human Services, and it was filed with the appropriate Congressional committees and the Library of Congress on October 9, 2016. ACBTSA is authorized to operate until October 9, 2018. A copy of the charter can be obtained on the ACBTSA Web site at <http://www.hhs.gov/ash/bloodsafety>.

Copies of the charters for the designated committees also can be obtained by accessing the FACA database that is maintained by the Committee Management Secretariat under the General Services Administration. The Web site address for the FACA database is <http://facadatabase.gov/>.

Dated: October 20, 2016.

Karen B. DeSalvo,

Acting Assistant Secretary for Health.

Short-Term Alternative Animal Models or In Vitro Tests Used To Identify Substances With the Potential To Cause Excessive Inflammation or Exaggerated Immune Responses; Request for Information

SUMMARY: The National Toxicology Program (NTP) at the National Institute of Environmental Health Sciences (NIEHS) requests available data and information on approaches and/or technologies currently used to identify substances with the potential to cause excessive inflammation or exaggerated immune responses leading to tissue injury when swallowed, inhaled, or absorbed through the skin. Submitted information will be used to assess the state of the science and determine

technical needs for non-animal test methods that could be used to evaluate the potential of chemicals to induce inflammation and immune-related conditions.

DATES: Receipt of information: Deadline is December 12, 2016.

ADDRESSES: Data and information should be submitted electronically at <http://ntp.niehs.nih.gov/go/input>.

FOR FURTHER INFORMATION CONTACT: Dr. Dori Germolec, Toxicology Branch, Division of NTP, NIEHS; email: germolec@niehs.nih.gov; telephone: (919) 541-3230.

SUPPLEMENTARY INFORMATION:

Background: NTP has an interest in developing more efficient and scalable test platforms to provide the scientific basis for predictive models of chemical effects on human disease. Short-term toxicity tests may be conducted to determine the potential for a single or short-term dose of a substance to cause inflammation-related responses or impact local and systemic immune function when inhaled (inhalation toxicity testing), swallowed (oral toxicity testing), or absorbed through the skin (dermal toxicity testing). A number of observations support a role for environmental influences on inflammatory and immune-related diseases such as diabetes. One specific use of information received in response to this request is to assist NTP in identifying *in vitro* or alternative animal model screens that might be used to assess the potential for chemicals to cause outcomes related to Type 1 diabetes. In addition, information received from this request will provide fundamental knowledge on the use of these *in vitro* platforms for identifying environmental triggers of excessive inflammation and exaggerated immune responses that could lead to tissue injury.

Request for Information: NTP requests available data and information on approaches and/or technologies currently used to identify substances with the potential to cause excessive inflammation or exaggerated immune responses leading to tissue injury. Respondents should provide information on any activities relevant to the development or validation of alternatives to *in vivo* tests currently used in the assessment of immune toxicity and autoimmunity.

Respondents to this request for information should include their name, affiliation (if applicable), mailing address, telephone, email, and sponsoring organization (if any) with their communications. The deadline for

receipt of the requested information is December 12, 2016.

Responses to this request are voluntary. No proprietary, classified, confidential, or sensitive information should be included in responses. This request for information is for planning purposes only and is not a solicitation for applications or an obligation on the part of the U.S. Government to provide support for any ideas identified in response to the request. Please note that the U.S. Government will not pay for the preparation of any information submitted or for its use of that information.

Background Information on NTP: NTP is an interagency program established in 1978 (43 FR 53060) to strengthen the Department's activities in toxicology research and testing and to develop and validate new and better testing methods. Other activities of the program focus on strengthening the science base in toxicology and providing information about potentially toxic chemicals to health-regulatory and research agencies, scientific and medical communities, and the public. NTP is located administratively at the NIEHS. Information about NIEHS and NTP is available at <http://www.niehs.nih.gov> and <http://ntp.niehs.nih.gov>, respectively.

Dated: October 20, 2016.

National Institute of Allergy and Infectious Diseases; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Allergy and Infectious Diseases Special Emphasis Panel; HIV Vaccine Research and Design (HIVRAD) Program (P01).

Date: November 16–17, 2016.

Time: 9:00 a.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 5601 Fishers Lane, Rockville, MD 20892 (Telephone Conference Call).

Contact Person: Vasundhara Varthakavi, DVM, Ph.D., Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, Room 3E70, National Institutes of Health, NIAID, 5601 Fishers Lane, MSC 9823, Bethesda, MD 20892–9823, (240) 669–5020, varthakaviv@niaid.nih.gov.

Name of Committee: National Institute of Allergy and Infectious Diseases Special Emphasis Panel; Rapid Assessment of Zika Virus (ZIKV) Complications (R21).

Date: November 18, 2016.

Time: 12:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 5601 Fishers Lane, Rockville, MD 20892 (Telephone Conference Call).

Contact Person: Raymond R. Schleef, Ph.D., Senior Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, Room 3E61, National Institutes of Health/NIAID, 5601 Fishers Lane, MSC 9823, Bethesda, MD 20892–9823, (240) 669–5019, schleefrr@niaid.nih.gov.
