SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authorization for the information collection requirements contained in the Cranes and Derricks

Standard codified in regulations 29 CFR part 1926 subpart CC. These requirements mandate an Occupational Safety and Health Act (OSH Act) covered employer subject to the Standard to produce and maintain records documenting controls and other measures taken to protect workers from hazards related to cranes and derricks used in construction. Accordingly, a construction business with workers who operate or work in the vicinity of cranes and derricks must have, as applicable, the following documents on file and available at the job site: equipment ratings, employee training records, written authorizations from qualified individuals, operator's certification documents, and qualification program audits. OSH Act sections 2(b)(3), 6(b)(7), and 8(c) authorize this information collection. See 29 U.S.C. 651(b)(3), 655(b)(7), and 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0261.

OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on October 4, 2016 (81 FR 68456).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0261. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary

for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Definition and Requirements for a Nationally Recognized Testing Laboratory (NRTL) information collection. A number of OSHA issued standards contain requirements that specify employers use only equipment, products, or material tested or approved by a NRTL. These requirements ensure that employers use safe and efficacious equipment, products, or materials in complying with the standards. Accordingly, the OSHA promulgated its Program Regulation for Nationally Recognized Testing Laboratories, 29 CFR 1910.7 (the Regulation). The Regulation specifies procedures that an organization must follow to apply for and to maintain OSHA recognition to test and certify equipment, products, or material for safe use in the workplace. The OSHA has also developed standardized optional use forms to facilitate and simplify the information

collection process. The forms correspond to the application, expansion, and renewal processes defined in the NRTL Program. Occupational Safety and Health Act sections 2(b)(3), (9), and (12) and 8(c) and (g) authorize this information collection. See 29 U.S.C. 651(b)(3), (9), (12); 657(c) and (g).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0147.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the DOL seeks to extend PRA authorization for this information collection for three (3) more years without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on December 28, 2016 (81 FR 95650).
