**SUPPLEMENTARY INFORMATION:** The James  
Zadroga 9/11 Health and Compensation

3312(a)(6)(F) requires the Administrator  
to provide for an independent peer  
review of the scientific and technical  
evidence that would be the basis for  
issuing a final rule to add a health  
condition to the List prior to issuing the  
final rule. To assist in accomplishing  
independent peer review in a timely  
manner, the Administrator has  
determined that he will develop a  
standing pool of persons with the  
scientific, technical, and medical  
background to potentially serve in this  
role to provide their individual input to  
the Administrator based on the health  
condition in the proposed rule under  
consideration. The peer reviewers will  
not meet as a group, provide consensus  
advice or recommendations to the  
Administrator, or produce a collective  
work product(s). Therefore, the  
Administrator is requesting nominations  
of persons to serve as scientific peer  
reviewers.

All persons who have the necessary  
minimum qualifications will be  
included in the standing pool of  
potential peer reviewers. These persons  
will be included in the standing pool of  
potential peer reviewers for 3 years  
unless they request in writing to be  
removed. After 3 years persons may be  
nominated again and will be required to  
update their information.

The Administrator will select peer  
reviewers for any proposed rule by  
matching the nature of the proposed

addition to the List and the nominee's background and expertise, as well as any potential conflict of interest. In selecting peer reviewers, the WTC Program Administrator will consider individuals nominated in response to this **Federal Register** notice, as well as other qualified individuals.

Dated: March 17, 2017.

*Administrator, World Trade Center Health Program and Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, Department of Health and Human Services.*

**SUPPLEMENTARY INFORMATION:** The Centers for Disease Control and Prevention (CDC) within the U.S. Department of Health and Human Services (HHS), has prepared a Draft Environmental Assessment (Draft EA) to assess the potential impacts associated with the implementation of the CDC Chamblee Campus 2025 Master Plan (Master Plan) for HHS/CDC's Chamblee Campus located at 4770 Buford Highway, Chamblee, Georgia. An update to the previous Master Plan was prepared to guide the future development of the Chamblee Campus for the planning horizon of 2017 to 2025, corresponding to the growing research needs in support of HHS/CDC's mission, and the specific requirements of its component organizations.

HHS/CDC analyzed two alternatives in the Draft EA: The Proposed Action and the No Build Alternative. The Proposed Action assessed in the Draft EA is the implementation of the CDC Chamblee Campus 2025 Master Plan (Master Plan). The Master Plan provides a framework for future growth on the Chamblee Campus in order to ensure that the campus can support HHS/CDC's mission and to guide strategic decisions about the allocation of Federal resources. The Master Plan identifies a number of potential improvements to be completed through the 2025 timeframe, and establishes design and planning guidelines. Improvements proposed under the Master Plan include new laboratory construction, new office building construction, parking expansion, off-campus office consolidation and additional infrastructure upgrades.

The No Build Alternative represents continued operation of the existing facilities at the Chamblee Campus without any new construction or major building additions over the planning period from 2017 to 2025. Under the No Build Alternative, two existing buildings and three trailers on the campus would be demolished. The employee population at the Chamblee Campus is projected to increase by approximately 367 new occupants under the No Build Alternative due to potential background growth of existing Campus programs.
