

quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on FSA's services will be unavailable.

FSA will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are non-controversial and do not raise issues of concern to other Federal agencies;
- The collections are targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered will be used only internally for general service improvement and program management purposes and is not intended for release outside of FSA;
- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and
- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as religious beliefs, sexual behavior and attitudes, and other matters that are commonly considered private.

The estimated total annual burden hours are being amended due to an increase in the number of FSA customers that will respond to the customer survey, which therefore increased the information collection requirements. Annual responses have increased by 590,000, with a resulting increase of 295,000 burden hours in the request.

For the following estimated total annual burden on respondents, the formula used to calculate the total burden hours is the estimated average time per response multiplied by the estimated total annual number of responses.

Estimate of Average Time to Respond: Public reporting burden for collecting

information under this notice is estimated to average 30 minutes (0.50 hours) per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Individuals and Households; Businesses; Organizations; and State, Local, or Tribal government.

Estimated Number of Respondents: 600,000.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 600,000.

Estimated Average Time per Response: 30 minutes (0.50 hours).

Estimated Total Annual Burden Hours on Respondents: 300,000 hours.

We are requesting comments on all aspects of this information collection to help us to:

- (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of the agency's estimate of the burden of the collection of information including the validity of the methodology and assumptions used;
- (3) Evaluate the quality, utility, and clarity of the information technology; and
- (4) Minimize the burden of the information collection on those who respond through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses where provided, will be made a matter of public record. Comments will be summarized and included in the request for OMB approval of the information collection.

Chris P. Beyerhelm,

Acting Administrator, Farm Service Agency.
