

of postsecondary institutions and students that contains student-level records on student demographics and family background, work experience, expectations, receipt of financial aid, and postsecondary enrollment (see <http://nces.ed.gov/surveys/npsas/about.asp>; (OMB #1850-0666)). Since 1987, NPSAS has been fielded every 3 to 4 years, most recently during the 2015–16 academic year. The goal of the NCER–NPSAS grant opportunity collaboration is to provide researchers with the possibility of developing unique research projects pertaining to college persistence and completion that utilize a subset of the NPSAS sample that is not already set aside for one of the NPSAS-based longitudinal studies (BPS or B&B). Under the NCER–NPSAS grant opportunity, researchers can submit applications to the Postsecondary and Adult Education topic within the Education Research Grants program (CFDA 84.305A), under either the Exploration or Efficacy and Replication research goal. Consistent with these two goals, NCER supports research projects using NPSAS to: (1) Explore relationships between malleable factors (e.g., information on benefits of financial aid and FAFSA renewal) and postsecondary persistence and completion, as well as the mediators and moderators of those relationships; and (2) evaluate the efficacy of interventions aimed at improving persistence and completion of postsecondary education (e.g., financial aid and FAFSA renewal advice delivered via text messaging). Researchers approved for funding through this program can obtain indirect access to a subsample of the national NPSAS sample (after the study's student interviews are completed) in order to conduct unique research projects that adhere to the guidelines set forth in the Request for Applications (RFA) for the Education Research Grants Program, as well as guidelines set forth by NCES and the NPSAS program. This request is to conduct, in 2017, the "Connecting Students with Financial Aid (CSFA) 2017: Testing the Effectiveness of FAFSA Interventions on College Outcomes" study, funded by the NCER–NPSAS grant and designed to measure the effectiveness of an intervention that will provide financial aid information and reminders to college students who were initially interviewed as part of NPSAS:16 was approved in January 2017 (OMB# 1850-0931 v.1). Cognitive interviews on the survey items were conducted in March 2017 to examine whether college students correctly understand the question wording and

whether their answers get adequately captured in multiple-choice questions of the survey instrument to be administered after the end of the intervention. The results of cognitive testing were used to revise the CSFA survey. This request is for approval of these revisions for the survey that will begin in September 2017.
