

Time (EDT) and the second meeting is scheduled for August 31, 2017 from 1:00 p.m. to 5:00 p.m. EDT. These times and the agenda topics described below are subject to change. For the latest agenda please refer to the SAB Web site: <http://sab.noaa.gov/SABMeetings.aspx>.

ADDRESSES: Conference call. Public access is available at: NOAA, SSMC 3 Room 11836, 1315 East-West Highway, Silver Spring, MD for the July 5 meeting and SSMC 3, Room 7836 for the August 31 meeting. Members of the public will not be able to dial in to this meeting.

FOR FURTHER INFORMATION CONTACT: Dr. Cynthia Decker, Executive Director, SSMC3, Room 11230, 1315 East-West Hwy., Silver Spring, MD 20910; Phone Number: 301-734-1156; Email: Cynthia.Decker@noaa.gov; or visit the SAB Web site at <http://sab.noaa.gov/SABMeetings.aspx>.

SUPPLEMENTARY INFORMATION: The NOAA Science Advisory Board (SAB) was established by a Decision Memorandum dated September 25, 1997, and is the only Federal Advisory Committee with responsibility to advise the Under Secretary of Commerce for Oceans and Atmosphere on strategies for research, education, and application of science to operations and information services. SAB activities and advice provide necessary input to ensure that National Oceanic and Atmospheric Administration (NOAA) science programs are of the highest quality and provide optimal support to resource management.

Status: The July 5, 2017 meeting will be open to public participation with a 5-minute public comment period at TBD PM EDT. The August 31, 2017 meeting will have a 5-minute public comment period at 5:20 p.m. EDT. The SAB expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three minutes. Written comments for the July 5, 2017 meeting by June 28, 2017 and written comments for the August 31, 2017 meeting should be received in the SAB Executive Director's Office by August 24, 2017 to provide sufficient time for SAB review. Written comments received after by the SAB Executive Director after these dates will be distributed to the SAB, but may not be reviewed prior to the meeting date.

Special Accommodations: These meetings are physically accessible to people with disabilities. Requests for special accommodations may be directed to the Executive Director no later than 12 p.m. on June 28 for the July

5 meeting and by 12 p.m. on August 24 for the August 31 meeting.

Matters to be Considered: The meeting on July 5 will include discussions on short term work plan topics for the SAB and the revised Terms of Reference and proposed members for the proposed High Performance Computing subcommittee. The August 31 meeting will include further discussion on the SAB short term work plan and discussion of results of the subcommittee reviews. Meeting materials, including work products will be made available on the SAB Web site: <http://sab.noaa.gov/SABMeetings.aspx>.

Dated: May 22, 2017.

Paul Johnson,

*Acting Deputy Chief Financial Officer/CAO,
Office of Oceanic and Atmospheric Research,
National Oceanic and Atmospheric
Administration.*

BILLING CODE 3510-KD-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XF400

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Applications for one new scientific research permit and five scientific research permit renewals.

SUMMARY: Notice is hereby given that NMFS has received six scientific research permit application requests relating to Pacific salmon and steelhead. The proposed research is intended to increase knowledge of species listed under the Endangered Species Act (ESA) and to help guide management and conservation efforts. The applications may be viewed online at: https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm.

DATES: Comments or requests for a public hearing on the applications must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific standard time on June 26, 2017.

ADDRESSES: Written comments on the applications should be sent to the Protected Resources Division, NMFS, 1201 NE Lloyd Blvd., Suite 1100, Portland, OR 97232-1274. Comments may also be sent via fax to 503-230-

5441 or by email to nmfs.nwr.apps@noaa.gov (include the permit number in the subject line of the fax or email).

FOR FURTHER INFORMATION CONTACT: Rob Clapp, Portland, OR (ph.: 503-231-2314), Fax: 503-230-5441, email: Robert.Clapp@noaa.gov. Permit application instructions are available from the address above, or online at <https://apps.nmfs.noaa.gov>.

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

The following listed species are covered in this notice:

Chinook salmon (*Oncorhynchus tshawytscha*): Endangered upper Columbia River (UCR); threatened Snake River (SR) spring/summer (spr/sum).

Steelhead (*O. mykiss*): Threatened UCR; threatened SR; threatened middle Columbia River (MCR), threatened Lower Columbia River (LCR).

Authority

Scientific research permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR parts 222-226). NMFS issues permits based on findings that such permits: (1) Are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Anyone requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). Such hearings are held at the discretion of the Assistant Administrator for Fisheries, NMFS.

Applications Received

Permit 1379-7R

The Columbia River Inter-Tribal Fish Commission (CRITFC) is seeking to renew a permit that currently allows them to take listed salmonids (UCR steelhead and Chinook) while conducting research designed to (1) increase what we know about the status and productivity of various fish populations, (2) collect data on migratory and exploitation (harvest) patterns, and (3) develop baseline information on various population and habitat parameters in order to guide salmonid restoration strategies. Much of the work in the permit has been conducted for nearly 20 years—first

under permit 1134, and then under six previous versions of 1379. The permit would comprise three studies: Project 1—Juvenile Upriver Bright Fall Chinook Sampling at the Hanford Reach; Project 2—Adult Sockeye Sampling at Tumwater and Wells Dams; and Project 3—Acoustic trawl survey for Lake Wenatchee juvenile sockeye salmon.

The research, as a whole, would benefit listed fish by helping managers set in-river and ocean harvest regimes so that they have minimal impacts on listed populations. It would also help managers prioritize projects in a way that gives maximum benefit to listed species—including projects designed to help the listed fish recover. The researchers would use beach- and stick seines to capture and tag juvenile fish in the Hanford reach of the Columbia River and capture fish during mid-water trawls in Lake Wenatchee. Those fish that are not immediately released upon capture would be transported to a holding facility where they would be anesthetized, examined for marks, adipose-clipped, coded wire tagged, allowed to recover, and released. The researchers would also collect, anesthetize, tissue-sample, and tag adult salmonids at Tumwater and Wells Dams in Washington State. The CRITFC researchers do not intend to kill any of the fish being captured but a small number may die as an unintended result of the activities.

Permit 13381–3R

The Northwest Fisheries Science Center (NWFSC) is seeking to renew their permit to annually take natural juvenile SR spring/summer Chinook salmon and SR steelhead in various places in the Salmon River drainage in Idaho and at Little Goose and Lower Granite Dams on the lower Snake River. The purpose of the research is to continue monitoring parr-to-smolt survival and outmigration behavior in SR wild spring/summer Chinook salmon populations from Idaho. Steelhead juveniles that are inadvertently collected would also be tagged to help supplement an ongoing Idaho Department of Fish and Game study. The research would benefit the fish by continuing to supply managers with the information they need to budget water releases at hydropower facilities in ways designed to help protect migrating juvenile salmonids. The information gained would also be used to build long-term data sets on parr-to-smolt migration behavior and survival rates. This information, coupled with water quality, weather, and climate data, is intended to provide a foundation for understanding these

populations' life histories—the knowledge of which is critical to building effective recovery actions. The listed fish would be captured (using seines, dip nets, and electrofishing), anesthetized, tagged, and released. A portion of these fish would also be recaptured at a smolt bypass facility, anesthetized, weighed, measured, and released. The researchers do not intend to kill any of the fish being captured, but a small percentage may die as an unintended result of the research activities.

Permit 13382–3R

The NWFSC is seeking to renew for five years a permit that currently allows them to annually take juvenile threatened SR spring/summer Chinook salmon and juvenile threatened SR steelhead at various places in the Snake River in Idaho and in various streams of Southeast Washington and Northeast Oregon. Most of the activities under this permit have been under way for nearly 20 years—first under Permit 1406 and then under previous versions of Permit 13382. Under the permit, the listed fish would be variously captured (using seines, dip nets, traps, and electrofishing), anesthetized, tissue sampled, weighed, measured, and released. They researchers would also add another study for this permit—one in which a small number of juvenile fish would be caught using electrofishing methods, anesthetized, and then held at varying temperature regimes to measure their cardiac performance. The fish would then in all cases be allowed to recover from the anesthetic and returned live to the place of their capture.

The purposes of the research are therefore (1) to continue monitoring the effects of supplementation among steelhead and spring/summer Chinook salmon populations in Idaho, and (2) measure cardiac performance in juvenile salmonids. The research would benefit the fish by continuing to supply managers with the information they need when seeking to use hatchery programs to conserve listed species. The researchers do not intend to kill any of the fish being captured, but some may die as an unintended result of the process.

Permit 17222–2R

The Confederated Tribes of the Warm Springs Reservation of Oregon (CTWSRO) are seeking a five-year permit to annually take MCR steelhead during the course of research designed to determine the feasibility of PIT-tagging juvenile summer/fall Chinook (a non-listed species) in the Deschutes

River, Oregon. The purpose of the research is to generate population metrics such as juvenile growth rates, smolt-to-adult return ratios, size/condition at emigration, etc. This information would be used to develop performance indicators for monitoring the fishes' status and trends. This research would benefit listed species by helping managers develop a picture of river health and salmonid population trends in the Deschutes River. That information, in turn, would be used in recovery planning efforts and generally incorporated into resource management decisions that may affect the Deschutes River. The researchers intend to use seines to capture the fish and all captured MCR steelhead will be released immediately. The researchers do not propose to kill any of the listed salmonids being captured, but a small number may die as an unintended result of the activities.

Permit 17306–2R

The Oregon Department of Fish and Wildlife (ODFW) is seeking a five-year permit to capture threatened MCR steelhead (adults and juveniles) in the upper Deschutes River, Oregon. The various proposed activities would include adult and juvenile snorkel surveys throughout the basin, screw trapping, backpack and boat electrofishing and mark/recapture studies, hook and line surveys, telemetry, seining, spawning ground surveys using weirs and redd counts, monitoring habitat restoration projects, and setting traps and nets in reservoirs for population monitoring. Data collected from this work would be used to inform management decisions in the Deschutes River watershed. Biologists from the ODFW have been conducting this work in the area for decades. The researchers do not intend to kill any of the fish being captured, but a small percentage may be killed as an inadvertent result of the activities.

Permit 21220

The National Ecological Observatory Network (NEON) is seeking a five-year permit to take adult and juvenile LCR steelhead while conducting in-depth ecosystem research at an aquatic monitoring site on Martha Creek on the Gifford-Pinchot National Forest in the State of Washington. The NEON researchers intend to collect a comprehensive suite of biotic and abiotic data at the site, including sampling for fish, macroinvertebrates, microbes, plants, algae, sediments, water quality, and reeration. Additionally, they would make discharge measurements, conduct a

riparian habitat assessment and a morphological survey. The purpose of the research is to establish an ecological observatory with the goal of monitoring climate change, land use changes, and invasive species for the next 30 years.

The researchers would use backpack electrofishing equipment to capture fish. The fish would then be anesthetized, identified, photographed, measured, allowed to recover, and released back to the stream. Some tissue samples may be taken as well. The research would benefit listed fish by generating long-term data sets on the animals' health, abundance, and status in general. Those data, in turn, would be used to inform management decisions on the Gifford-Pinchot National Forest and the lower Columbia River ecosystem. The researchers do not intend to kill any of the fish being captured, but a small percentage may be killed as an inadvertent result of the activities.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the applications, associated documents, and comments submitted to determine whether the applications meet the requirements of section 10(a) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.

Dated: May 22, 2017.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Processed Products Family of Forms

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before July 25, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at pracomments@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Melissa Yenko, (301) 427-8193 or melissa.yenko@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a current information collection.

National Oceanic and Atmospheric Administration (NOAA) annually collects information from seafood and industrial fishing processing plants on the volume and value of their processed fishery products and their monthly employment figures. NOAA also collects monthly production volume of fish meal, oil, and solubles. The information gathered is used by NOAA in the economic and social analyses developed when proposing and evaluating fishery management actions.

II. Method of Collection

In the current survey, NOAA Fisheries provides each processor with a pre-printed survey form that includes the products produced by that processor in the previous year. The processor only needs to fill in the quantity of product, value of product, monthly employment, and add any new products. New firms to the survey are provided blank forms. Responses are submitted by mail, via postage-paid envelopes provided by NOAA Fisheries.

III. Data

OMB Control Number: 0648-0018.

Form Number: NOAA Forms 88-13, 88-13C.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 747.

Estimated Time per Response: 30 minutes for an Annual Processed Products Report and 15 minutes for a monthly Fishery Products Report Fish Meal and Oil.

Estimated Total Annual Burden Hours: 392.

Estimated Total Annual Cost to Public: \$0 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 22, 2017.

Sarah Brabson,

NOAA PRA Clearance Officer.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XF452

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Skate Committee to consider actions affecting New England fisheries in the exclusive economic zone (EEZ).

Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Tuesday, June 13, 2017 at 9:30 a.m.

ADDRESSES:

Meeting address: The meeting will be held at the Holiday Inn, 31 Hampshire Street, Mansfield, MA 02048; telephone: (508) 339-2200.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director,
