

submitted a request for renewal of an existing collection of information to OMB for review titled "Licenses for Radiography and Radiation Safety Requirements for Radiographic Operations." The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on March 17, 2017 (82 FR 14236).

1. *The title of the information collection:* "10 CFR part 34, Licenses for Radiography and Radiation Safety Requirements for Radiographic Operations."

2. *OMB approval number:* 3150-0007.

3. *Type of submission:* Extension.

4. *The form number if applicable:* N/A.

5. *How often the collection is required or requested:* Applications for new licenses and amendments may be submitted at any time (on occasion). Applications for renewal are submitted every 10 years. Reports are submitted as events occur.

6. *Who will be required or asked to respond:* Applicants for and holders of specific licenses authorizing the use of licensed radioactive material for radiography.

7. *The estimated number of annual responses:* 3,031 (141 reporting responses + 2,312 third-party disclosure responses + 578 recordkeepers).

8. *The estimated number of annual respondents:* 578 (500 Agreement State licensees plus 78 NRC licensees).

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 260,457 hours (2,770 reporting + 234,741 recordkeeping + 22,946 third party disclosure).

10. *Abstract:* Part 34 of title 10 of the *Code of Federal Regulations* (10 CFR) establishes radiation safety requirements for the use of radioactive material in industrial radiography. The information in the applications, reports, and records is used by the NRC staff to ensure that the health and safety of the public is protected and that licensee possession and use of source and byproduct material is in compliance with license and regulatory requirements.

For the Nuclear Regulatory Commission.

David Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 30-34221; License No. 21-26748-01; EA-16-282; NRC-2017-0147]

In the Matter of Tilden Mining, L.C.

AGENCY: Nuclear Regulatory Commission.

ACTION: Confirmatory order; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a Confirmatory Order to Tilden Mining Company, L.C. (Tilden Mining) as a result of an agreement reached during an Alternative Dispute Resolution mediation session conducted on May 8, 2017. The mediation session was conducted to reach agreement on the corrective actions to be implemented by Tilden Mining in response to apparent violations involving the failure to implement a security program in accordance with NRC requirements. The Confirmatory Order documents the corrective action commitments made by Tilden Mining and is effective on July 14, 2017.

DATES: *Effective Date:* June 14, 2017.

ADDRESSES: Please refer to Docket ID NRC-2017-0147 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2017-0147. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One

White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT:

Kenneth J. Lambert, Region III, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 630-710-4376; email: Kenneth.Lambert@nrc.gov.

SUPPLEMENTARY INFORMATION: The text of the Order is attached.

Dated at Lisle, Illinois, this 16th day of June 2017.

For the Nuclear Regulatory Commission.

Cynthia D. Pederson,

Regional Administrator, NRC Region III.

UNITED STATES OF AMERICA

NUCLEAR REGULATORY COMMISSION

In the Matter of Tilden Mining Company L.C.

Docket No. 30-34221

License No. 21-26748-01

EA-16-282

CONFIRMATORY ORDER MODIFYING LICENSE (EFFECTIVE UPON ISSUANCE) (NRC-2017-0147)

I

Tilden Mining Company L.C. (Tilden Mining or Licensee) is the holder of byproduct material License No. 21-26748-01 issued on June 3, 2014, by the U.S. Nuclear Regulatory Commission (NRC or Commission) pursuant to Part 30 of Title 10 of the *Code of Federal Regulations* (CFR). The license authorizes the possession and use of fixed gauges and silica analyzers at the Tilden Mine in accordance with conditions specified therein. The facility is located on the Licensee's site in Marquette County, Michigan.

This Confirmatory Order is the result of an agreement reached during an Alternative Dispute Resolution (ADR) mediation session conducted on May 8, 2017.

II

On March 9, 2017, the NRC issued Inspection Report 03034221/2016001(DNMS) to Tilden Mining, which documented the identification of apparent violations that were being considered for escalated enforcement action in accordance with the NRC Enforcement Policy. The apparent violations involved the failure to implement its security program in accordance with NRC requirements.

By letter, dated March 9, 2017, the NRC notified Tilden Mining of the results of the inspection with an opportunity to: (1) Provide a response in writing, (2) attend a predecisional

enforcement conference or (3) participate in an ADR mediation session in an effort to resolve these concerns.

In response to the NRC's offer, Tilden Mining requested the use of the NRC's ADR process to resolve differences it had with the NRC. On May 8, 2017, the NRC and Tilden Mining met in an ADR session mediated by a professional mediator, arranged through Cornell University's Institute on Conflict Resolution. The ADR process is one in which a neutral mediator, with no decision-making authority, assists the parties in reaching an agreement on resolving any differences regarding the dispute. This Confirmatory Order is issued pursuant to the agreement reached during the ADR process.

III

During the ADR session, Tilden Mining and the NRC reached a preliminary settlement in an Agreement in Principle. The elements of the agreement include the following:

Tilden Mining has already taken a number of corrective actions including:

1. Repaired the alarm;
2. Installed a more robust door-access system; and
3. Initiated training for appropriate personnel on the operation of the new alarm system.

Therefore, the parties agree to the following terms and conditions:

1. Tilden Mining shall establish a Radioactive Material Oversight Committee to oversee the implementation of the Licensee's programs for radiation safety and radioactive source security. The Committee shall review and update the scope of work and documentation requirements for the Licensee's annual radiation safety and security audits/program reviews.

The Committee shall be comprised of the Radiation Safety Officer (RSO), the RSO's Manager, the Site General Manager, and other relevant stakeholders.

The Committee shall be established and hold its first meeting no later than September 30, 2017. Thereafter, the Committee shall at a minimum meet three times in 2018, twice in 2019, and annually thereafter until December 31, 2022.

The Committee shall review annual audits/program reviews and the effectiveness reviews required by paragraph 2 of this Agreement in Principle and ensure corrective actions are implemented, as appropriate. The Committee shall ensure that corrective actions and tasks required to ensure compliance are adequately documented

and controlled within the Licensee's work-tracking system.

The Committee shall maintain records of its meetings to enable NRC inspection.

2. Tilden Mining shall complete two effectiveness reviews of the corrective actions taken in response to the Confirmatory Order. Each effectiveness review supplements the annual audits/program reviews required by NRC regulations and may be combined with those required audits/reviews. Each effectiveness review shall be conducted by an independent consultant.

The first effectiveness review shall be conducted no later than December 31, 2018, and the second shall be conducted no later than December 31, 2020.

The scope of each effectiveness review shall include review of Radioactive Material Oversight Committee activities and the effectiveness and sustainability of the corrective actions taken in response to the Confirmatory Order.

The Licensee shall provide a copy of the results of each effectiveness review to the Director, Division of Nuclear Materials Safety (DNMS), Region III, within 150 days of the Licensee's receipt of the consultant's final report. If the results indicate a potential or apparent violation of NRC requirements, the NRC will conduct an inspection to determine the facts and assess the significance prior to proposing any enforcement action.

3. For a period of 5 years from the date of the Confirmatory Order, Tilden Mining shall reflect in its work-tracking system tasks governing:

- a. Annual coordination with the local law enforcement authority;
- b. Twice yearly alarm system testing;
- c. Any corrective actions directed by the Radioactive Material Oversight Committee; and
- d. Maintenance pertinent to security systems required under the applicable regulation.

4. For a period of 5 years from the date of the Confirmatory Order, Tilden Mining shall provide annual training to affected personnel on the access control and alarm response requirements of the applicable regulations and the Licensee's implementing procedures.

Based on the completed actions described above, and the commitments described in Section V below, the NRC agrees not to pursue any further enforcement action in connection with the NRC's March 9, 2017, letter to Tilden Mining and not to issue a civil penalty. The NRC considers the Confirmatory Order as an escalated enforcement action; however, it will not be considered an escalated enforcement

action by the NRC for future assessment of violations occurring at Tilden Mining.

On June 13, 2017, Tilden Mining consented to issuing this Confirmatory Order with the commitments, as described in Section V below. Tilden Mining further agreed that this Confirmatory Order is to be effective upon issuance, the agreement memorialized in this Confirmatory Order settles the matter between the parties, and that it has waived its right to a hearing.

IV

I find that Tilden Mining's actions completed, as described in Section III above, combined with the commitments as set forth in Section V are acceptable and necessary, and conclude that with these commitments the public health and safety are reasonably assured. In view of the foregoing, I have determined that public health and safety require that Tilden Mining's commitments be confirmed by this Confirmatory Order. Based on the above and Tilden Mining's consent, this Confirmatory Order is effective upon issuance.

By no later than thirty (30) days after the completion of the commitments specified in Section V, Tilden Mining Company L.C. is required to notify the NRC in writing and summarize its actions.

V

Accordingly, pursuant to Sections 81, 161b, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR part 37, it is hereby ordered, effective upon issuance, that license No. 21-26748-01 is modified as follows:

1. Tilden Mining shall establish a Radioactive Material Oversight Committee to oversee the implementation of the Licensee's programs for radiation safety and radioactive source security. The Committee shall review and update the scope of work and documentation requirements for the Licensee's annual radiation safety and security audits/program reviews.

The Committee shall be comprised of the Radiation Safety Officer, the RSO's Manager, the Site General Manager, and other relevant stakeholders.

The Committee shall be established and hold its first meeting no later than September 30, 2017. Thereafter, the Committee shall at a minimum meet three times in 2018, twice in 2019, and annually thereafter until December 31, 2022.

The Committee shall review annual audits/program reviews and the effectiveness reviews required by paragraph 2 of this section and ensure corrective actions are implemented, as appropriate. The Committee shall ensure that corrective actions and tasks required to ensure compliance are adequately documented and controlled within the Licensee's work-tracking system.

The Committee shall maintain records of its meetings to enable NRC inspection.

2. Tilden Mining shall complete two effectiveness reviews of the corrective actions taken in response to this Confirmatory Order. Each effectiveness review supplements the annual audits/program reviews required by NRC regulations and may be combined with those required audits/reviews. Each effectiveness review shall be conducted by an independent consultant.

The first effectiveness review shall be conducted no later than December 31, 2018, and the second shall be conducted no later than December 31, 2020.

The scope of each effectiveness review shall include review of Radioactive Material Oversight Committee activities and the effectiveness and sustainability of the corrective actions taken in response to the Confirmatory Order.

Tilden Mining shall provide a copy of the results of each effectiveness review to the Director, DNMS, Region III, within 150 days of the Licensee's receipt of the consultant's final report. If the results indicate a potential or apparent violation of NRC requirements, the NRC will conduct an inspection to determine the facts and assess the significance prior to proposing any enforcement action.

3. For a period of 5 years from the date of the Confirmatory Order, Tilden Mining shall reflect in its work-tracking system governing:

- a. Annual coordination with the local law enforcement;
- b. Twice yearly alarm system testing;
- c. Any corrective actions directed by the Radioactive Material Oversight Committee; and
- d. Maintenance pertinent to security systems required under the applicable regulations.

4. For a period of 5 years from the date of this Confirmatory Order, Tilden Mining shall provide annual training to affected personnel on the access control and alarm response requirements of the applicable regulations and the Licensee's implementing procedures.

In the event of the transfer of the operating license of Tilden Mining to another entity, the terms and conditions

set forth in this Confirmatory Order shall continue to apply and accordingly survive any transfer of ownership or license.

The Regional Administrator, Region III may, in writing, relax or rescind any of the above conditions upon demonstration by Tilden Mining or its successors of good cause.

VI

In accordance with 10 CFR 2.202 and 10 CFR 2.309, any person adversely affected by this Confirmatory Order, other than Tilden Mining, may request a hearing within thirty (30) calendar days of the date of issuance of this Confirmatory Order. Where good cause is shown, consideration will be given to extending the time to request a hearing. A request for extension of time must be made in writing to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and include a statement of good cause for the extension.

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene (hereinafter "petition"), and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562, August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at hearing.docket@nrc.gov, or by telephone at 301-415-1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic

docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public Web site at <http://www.nrc.gov/site-help/e-submittals/getting-started.html>. Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit adjudicatory documents. Submissions must be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public Web site at <http://www.nrc.gov/site-help/electronic-sub-ref-mat.html>. A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed so that they can obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the "Contact Us" link located on the NRC's public Web site at <http://www.nrc.gov/site-help/e-submittals.html>, by email to MSHD.Resource@nrc.gov, or by a toll-free call at 1-866-672-7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555—

0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, Sixteenth Floor, One White Flint North, 11555 Rockville Pike, Rockville, Maryland, 20852, Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in NRC's electronic hearing docket, which is available to the public at <http://adams.nrc.gov/ehd>, unless excluded pursuant to an order of the Commission or the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click cancel when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. For example, in some instances, individuals provide home addresses in order to demonstrate proximity to a facility or site. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

The Commission will issue a Notice or Order granting or denying a hearing request or intervention petition, designating the issues for any hearing that will be held and designating the Presiding Officer. A notice granting a hearing will be published in the **Federal Register** and served on the parties to the hearing.

If a person (other than Tilden Mining) requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected

by this Confirmatory Order and shall address the criteria set forth in 10 CFR 2.309(d) and (f).

If a hearing is requested by a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearings. If a hearing is held, the issue to be considered at such hearing shall be whether this Confirmatory Order should be sustained.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section V above shall be final 30 days from the date of this Confirmatory Order without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section V shall be final when the extension expires if a hearing request has not been received.

For the Nuclear Regulatory Commission.
Dated this 14th day of June 2017.

Cynthia D. Pederson

Regional Administrator, NRC Region III.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-289 and 50-320; NRC-2017-0146]

Exelon Generation Company, LLC; Three Mile Island Nuclear Station, Units 1 and 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Environmental assessment and finding of no significant impact; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an amendment to Renewed Facility Operating License No. DPR-50 held by Exelon Generation Company, LLC (Exelon, the licensee) for the operation of Three Mile Island Nuclear Station (TMI), Units 1 and 2, located in Dauphin County, Pennsylvania. The proposed amendment would allow for changes to TMI's Radiological Emergency Plan Annex staffing levels to align with Exelon's standard fleet Emergency Response Organization (ERO) framework. In accordance with the Possession-Only License No. DPR-73 Post-Defueling Monitored Storage Safety Analysis Report for TMI, Unit 2, the emergency plan for Unit 1 is considered to encompass Unit 2. Therefore, an amendment to the Unit 2 license is not required. The NRC is

issuing an environmental assessment (EA) and finding of no significant impact (FONSI) associated with the proposed license amendment.

DATES: The EA referenced in this document is available on June 22, 2017.

ADDRESSES: Please refer to Docket ID NRC-2017-0146 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2017-0146. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Justin C. Poole, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington DC 20555-0001; telephone: 301-415-2048; email: Justin.Poole@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of a license amendment pursuant to section 50.54 of title 10 of the *Code of Federal Regulations* (10 CFR), "Conditions of licenses," paragraph (q), "Emergency plans," to Renewed Facility Operating License No. DPR-50 held by Exelon for the operation of TMI, Units 1 and 2, located in Dauphin County, Pennsylvania. In accordance with 10 CFR 51.21, the NRC performed the following EA that analyzes the environmental impacts of the proposed
