

Information Collection: Collection of Prescription Drug Event Data from Contracted Part D Providers for Payment; **Use:** The collected information is used primarily for payment, but is also used for claim validation as well as for other legislated functions such as quality monitoring, program integrity, and oversight. **Form Number:** CMS-10174 (OMB control number: 0938-0982); **Frequency:** Monthly; **Affected Public:** Business or other for-profits and Not-for-profit institutions; **Number of Respondents:** 779; **Total Annual Responses:** 1,409,828,464; **Total Annual Hours:** 2,820. (For policy questions regarding this collection contact Ivan Iveljic at 410-786-3312.)

5. **Type of Information Collection Request:** Reinstatement without change of a previously approved collection; **Title of Information Collection:** Medicaid Payment for Prescription Drugs—Physicians and Hospital Outpatient Departments Collecting and Submitting Drug Identifying Information to State Medicaid Programs; **Use:** States are required to provide for the collection and submission of utilization data for certain physician-administered drugs in order to receive federal financial participation for these drugs. Physicians, serving as respondents to states, submit National Drug Code numbers and utilization information for “J” code physician-administered drugs so that the states will have sufficient information to collect drug rebate dollars. **Form Number:** CMS-10215 (OMB control number: 0938-1026); **Frequency:** Weekly; **Affected Public:** Business or other for-profits and Not-for-profit institutions; **Number of Respondents:** 20,000; **Total Annual Responses:** 3,910,000; **Total Annual Hours:** 16,227. (For policy questions regarding this collection contact Lisa Ferrandi at 410-786-5445.)

6. **Type of Information Collection Request:** Reinstatement without change of a previously approved collection; **Title of Information Collection:** Request for Retirement Benefit Information; **Use:** Section 1818(d)(5) of the Social Security Act provides that former state and local government employees (who are age 65 or older, have been entitled to Premium Part A for at least 7 years, and did not have the premium paid for by a state, a political subdivision of a state, or an agency or instrumentality of one or more states or political subdivisions) may have the Part A premium reduced to zero. These individuals must also have 10 years of employment with the state or local government employer or a combination of 10 years of employment with a state or local government

employer and a non-government employer. The CMS-R-285 form is an essential part of the process of determining whether an individual qualifies for the premium reduction. The Social Security Administration will use this information to help determine whether a beneficiary meets the requirements for reduction of the Part A premium. **Form Number:** CMS-R-285 (OMB control number: 0938-0769); **Frequency:** Once; **Affected Public:** State, Local, or Tribal Governments; **Number of Respondents:** 500; **Total Annual Responses:** 500; **Total Annual Hours:** 125. (For policy questions regarding this collection contact Carla Patterson at 410-786-8911.)

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Notice of Single Source Award to the Genesee County Health Department for Addressing and Preventing Lead Exposure Through Healthy Start in Genesee County, Michigan

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice of single source award.

SUMMARY: HRSA announces its intent to award up to \$14,975,000 for a cooperative agreement to the Genesee County Health Department, which operates the Genesee County Healthy Start program. The purpose of this cooperative agreement is to expedite and strengthen the ongoing response to address the health effects of lead exposure resulting from the Flint, MI, public water supply contamination.

SUPPLEMENTARY INFORMATION:

Intended Recipient of the Award: Genesee County Health Department.

Amount of Non-Competitive Awards: Up to \$14,975,000.

Period of Funding: July 1, 2017–June 30, 2022.

CFDA Number: 93.926.

Authority: Water Infrastructure Improvements for the Nation (WIIN) Act (Pub. L. 114-322); Section 330H of the Public Health Service Act (42 U.S.C. 254c-8), as amended by Public Law 110-339, Section 2; and Further Continuing and Security Assistance

Appropriations Act, 2017 (Pub. L. 114-254).

Justification: Flint, MI, and the surrounding community continues to experience ongoing health needs, particularly among pregnant women and young children, associated with elevated levels of lead in the public water supply resulting from the city's switch from the Detroit Water Authority to the Flint Water Systems between April 2013 and October 2015.

On January 5, 2016, the state of Michigan declared a state of emergency for Genesee County, which includes the city of Flint, authorizing the use of state resources to address the public health crisis created by the elevated levels of lead in the public water system. On January 16, 2016, a federal emergency was declared for the state of Michigan and authorized federal assistance to provide water, water filters, water filter cartridges, water test kits, and other necessary related items.

Prenatal lead exposure can affect fertility, the likelihood of miscarriage, pre-term birth, low birth weight, infant neurodevelopment, and gestational hypertension. Of particular concern are the long-term effects in children such as developmental and cognitive delays, and behavioral disorders. The Healthy Start program aims to reduce disparities in infant mortality and improve perinatal and child health outcomes. To advance this mission, the goal of this program is to minimize developmental delays among lead-exposed children up to age 6 in Flint and the surrounding Genesee County area by connecting them to appropriate screening, services, and supports.

Thus, HRSA intends to award a one-time, single source cooperative agreement to the Genesee County Health Department to expedite and strengthen the ongoing response to address the health effects of lead exposure resulting from the Flint, MI, public water supply contamination. This award will enable the Genesee County Health Department to continue to play a vital role in assuring all pregnant women and children impacted by lead contamination in Genesee County have access to comprehensive health and social services. With these funds, the Genesee County Health Department will leverage its existing Healthy Start infrastructure and in-depth understanding of the maternal and child population in Genesee County to assess, mitigate, and provide consultation to pregnant women and children up to age 6 that may be impacted by lead exposure during the Flint water crisis. Activities under this award include identifying children in Flint and the

surrounding Genesee County area who have been affected by lead exposure to assess their receipt of recommended services in order to minimize developmental delay, and coordinating access to appropriate medical, behavioral, and developmental screening, services, and supports for impacted women, children, and their families. As the only Healthy Start grantee in the only community that had a federal emergency declaration concerning lead contamination in the last year, Genesee County Healthy Start has both the program and response infrastructure in place to immediately implement these enhanced activities.

This award will supplement, but not supplant, other federal resources currently dedicated to this effort, including activities previously funded under the current Healthy Start grant. Several federal agencies, such as the Centers for Medicare & Medicaid Services, have provided funds to organizations in Flint and Genesee County to support prevention, treatment, and remediation initiatives to address lead contamination in the community. This award should build upon, but not duplicate federal and local efforts. Activities under this award also align with existing lead response activities and involve close collaboration with broader community health system organizations, families, health professionals, local social support and health systems, community-based organizations, and early childhood systems, etc. This approach should ensure access to family-centered and comprehensive health and social services for all pregnant women and children up to age 6 years and their families impacted by lead contamination in Genesee County.

FOR FURTHER INFORMATION CONTACT: Robert Windom, Division of Healthy Start and Perinatal Services, Maternal and Child Health Bureau, Health Resources and Services Administration, 5600 Fishers Lane, Room 18N78, Rockville, Maryland 20852, (301) 443-8283, RWindom@hrsa.gov. For media inquiries, please contact press@hrsa.gov.

Dated: June 26, 2017.

George Sigounas,
Administrator.

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request; Information Collection Request Title: Poison Help General Population Survey, OMB Number 0915-0343, Reinstatement.

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). The ICR is for reinstatement of a previously approved information collection assigned OMB control number 0915-0343 that expired on May 31, 2014. Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this ICR must be received no later than September 5, 2017.

ADDRESSES: Submit your request to paperwork@hrsa.gov or mail the HRSA Information Collection Clearance Officer, Room 14N39, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email paperwor@hrsa.gov or call the HRSA Information Collection Clearance Officer at (301) 443-1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference, in compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995.

Information Collection Request Title: Poison Help General Population Survey, OMB Number 0915-0343, Reinstatement.

Abstract: HRSA is requesting approval by OMB for reinstatement of a previously approved collection of information (OMB control number 0915-0343). Annually, poison control centers (PCCs) in the U.S. manage approximately 2.8 million calls,

providing ready and direct access to vital public health emergency information and response. In 2001, the Poison Help line, a single, national toll-free phone number (800-222-1222) was established to ensure universal access to PCC services, 24 hours a day, 7 days a week. The Poison Help campaign is the only national media effort to promote awareness and use of the national toll-free phone number. The Poison Help campaign aims to reach a wide audience, as individuals of all ages are at risk for poisoning and may need to access PCC services. The "Poison Help General Population Survey" is a 10-minute telephone survey designed to assess the Poison Help campaign's impact among 2,000 households in the United States. The survey is conducted with an adult household member and addresses topics related to the types of individuals or organizations to contact for information, advice, and treatment related to a poisoning.

Need and Proposed Use of the Information: Survey results will be used to guide future communication, education, and outreach efforts and will allow the tracking of longitudinal data from near-identical prior surveys conducted in 2008 and 2011. The survey has been updated to include questions regarding one of the Secretary of Health and Human Service's priority areas, addressing the opioid crisis, and definitively ascertain respondents' knowledge of the Poison Help Line and phone usage.

Likely Respondents: This study includes two respondent groups, individuals and households with an adult member 18 years and older.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.
