

address one or more of the following four points:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* New collection.

(2) *Title of the Form/Collection:* Supplemental Fraud Survey (SFS) to the National Crime Victimization Survey (NCVS) 2017.

(3) *Agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form number for the questionnaire is SFS-1. The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Respondents will be persons age 18 or older living in households located throughout the United States sampled for the National Crime Victimization Survey (NCVS). The SFS will be conducted as a supplement to the NCVS in all sampled households for a three (3) month period. The SFS is an effort to measure the prevalence of financial fraud victimization among persons 18 or older, characteristics of fraud victims, and patterns of reporting fraud victimization to the police and other agencies. BJS plans to publish this information in reports and reference it when responding to queries from the U.S. Congress, Executive Office of the President, the U.S. Supreme Court, state officials, international organizations, researchers, students, the media, and others interested in criminal justice statistics.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to*

respond/reply: An estimate of the total number of respondents is 79,832. About 88% (70,252) will have no fraud victimization and will complete the short interview with an average burden of five (5) minutes. Among the 12% of respondents (9,580) who experience fraud victimization, the time to ask the detailed questions regarding the aspects of their fraud victimization is estimated to take an additional 10 minutes. Respondents will be asked to respond to this survey only once during the three month period.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 8,015 total burden hours associated with this collection.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., Suite 3E.405B, Washington, DC 20530.

Dated: July 5, 2017.

Melody Braswell,

Department Clearance Officer, PRA, U.S. Department of Justice.

BILLING CODE 4410-18-P

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Proposed Collection, Comment Request

AGENCY: Bureau of Labor Statistics, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed new collection of the “Quick Business Survey Operations Test.” A copy of the proposed information collection request

(ICR) can be obtained by contacting the individual listed below in the Addresses section of this notice.

DATES: Written comments must be submitted to the office listed in the Addresses section of this notice on or before September 8, 2017.

ADDRESSES: Send comments to Carol Rowan, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue NE., Washington, DC 20212. Written comments also may be transmitted by fax to 202-691-5111 (this is not a toll free number).

FOR FURTHER INFORMATION CONTACT: Carol Rowan, BLS Clearance Officer, at 202-691-7628 (this is not a toll free number). (See **ADDRESSES** section.)

SUPPLEMENTARY INFORMATION:

I. Background

The Bureau of Labor Statistics (BLS) intends to conduct an operations test of a Quick Business Survey (QBS). The BLS will conduct the test to evaluate QBS survey processes and operations in a possible production environment. If successful, a QBS would permit BLS to collect information about the U.S. economy more efficiently than is currently possible. This would allow data users to be able to understand the impact of specific events on the economy in a timely manner. Relevancy is one of BLS's main missions, and a QBS would allow BLS to provide information to the public in a more timely way that would be far more relevant to data users.

Each year, the Quarterly Census of Employment and Wages (QCEW) Program conducts the Annual Refiling Survey (ARS) by reaching out to approximately 1.2 million establishments requesting verification of their main business activity, and their mailing and physical location addresses. The fully web-based ARS provides a low-cost platform for conducting the QBS. The QBSs accompanying the ARS would have little data collection overhead, leveraging the address refinement, printing, and mailing efforts that are undertaken as part of the production ARS. Respondents already logged into the ARS secure Web site could be directed to a QBS and asked to answer a limited number of additional survey questions after completing the ARS.

II. Current Action

Office of Management and Budget clearance is being sought for the Quick Business Survey (QBS) Operations Test.

A QBS would allow BLS to leverage the multitude of information already known about the sample units to allow for targeted sampling. Samples could be selected based on different characteristics such as monthly employment, quarterly wages, industry codes, non-profit vs for profit status, etc. A QBS would permit BLS to target only the units meeting the specific set of characteristics desired allowing BLS to delve into specific areas of economic interest without burdening establishments which do not meet the specific targeted features. The QBS is designed to encourage a fast response and minimize respondent burden. In this manner, BLS can provide information that is needed quickly and is not collected elsewhere.

The goals of the test are to develop and evaluate a QBS system, to understand the extent to which ARS respondents have access to different types of information in order to provide parameters for future QBS, and to estimate response rates.

III. Desired Focus of Comments

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Type of Review: New Collection.

Agency: Bureau of Labor Statistics.

Title: Quick Business Survey Operations Test.

OMB Number: 1220—NEW.

Affected Public: Businesses or other for-profit institutions, not-for-profit institutions, and farms.

Total Respondents: 10,520.

Frequency: One time.

Total Responses: 10,520.

Average Time per Response: Five minutes.

Estimated Total Burden Hours: 877 hours.

Total Burden Cost (capital/startup): \$0.

Total Burden Cost (operating/maintenance): \$0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, this 3rd day of July 2017.

Kimberley Hill,

*Chief, Division of Management Systems,
Bureau of Labor Statistics.*

SUPPLEMENTARY INFORMATION:

I. Background

The American Time Use Survey (ATUS) is the Nation's first federally administered, continuous survey on time use in the United States. It measures, for example, time spent providing childcare, working, sleeping, or doing leisure activities. In the United States, several existing Federal surveys collect income and wage data for individuals and families, and analysts often use such measures of material prosperity as proxies for quality of life. Time-use data substantially augment these quality-of-life measures. The data also can be used in conjunction with wage data to evaluate the contribution of non-market work to national economies. This enables comparisons of production between nations that have different mixes of market and non-market activities.

The ATUS is used to develop nationally representative estimates of how people spend their time. This is done by collecting a time diary about the activities survey respondents did over a 24-hour period "yesterday," from 4 a.m. on the day before the interview until 4 a.m. on the day of the interview. In the one-time interview, respondents also report who was with them during the activities, where they were, how long each activity lasted, and if they were paid. All of this information has numerous practical applications for sociologists, economists, educators, government policymakers, businesspersons, health researchers, and others.

The Leave Supplement supports the mission of the Bureau of Labor Statistics by providing relevant information on economic and social issues. The data from the Leave Supplement can be used for research on the relationships between work schedules, job flexibilities, access to leave, and time use. These data enhance the understanding of people's overall well-being. The supplement surveys employed wage and salary workers, except those who are self-employed, aged 15 and up, from a nationally representative sample of approximately 2,060 sample households each month.

The Leave Supplement collects data about workers' access to and use of paid and unpaid leave, job flexibility, and their work schedules. The Leave Supplement also includes questions about shift work, advance notice of work schedules, workers' control over
