

To effectively perform environmental analyses for these projects, the DOE's EERE needs to collect project-specific information from Federal financial assistance awardees. DOE's EERE has developed its Environmental Questionnaire to obtain the required information and ensure that its decision-making processes are consistent with NEPA as it relates to renewable energy and energy efficiency research and development and demonstration projects. Minor changes have been made to the Environmental Questionnaire that help to clarify certain questions, but do not change the meaning of the questions being asked;

ENVIRONMENTAL PROTECTION AGENCY

[9965-35-OEI]

Cross-Media Electronic Reporting: Authorized Program Revision Approval, State of Illinois

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of the State of Illinois' request to revise its EPA Administered Permit Programs: The National Pollutant Discharge Elimination System EPA-authorized program to allow electronic reporting.

DATES: EPA approves of the State of Illinois' authorized program revision(s) as of August 8, 2017.

FOR FURTHER INFORMATION CONTACT: Karen Seeh, U.S. Environmental Protection Agency, Office of Environmental Information, Mail Stop 2823T, 1200 Pennsylvania Avenue NW., Washington, DC 20460, (202) 566-1175, seeh.karen@epa.gov.

SUPPLEMENTARY INFORMATION: On October 13, 2005, the final Cross-Media Electronic Reporting Rule (CROMERR) was published in the **Federal Register**

(70 FR 59848) and codified as part 3 of title 40 of the CFR. CROMERR establishes electronic reporting as an acceptable regulatory alternative to paper reporting and establishes requirements to assure that electronic documents are as legally dependable as their paper counterparts. Subpart D of CROMERR requires that state, tribal or local government agencies that receive, or wish to begin receiving, electronic reports under their EPA-authorized programs must apply to EPA for a revision or modification of those programs and obtain EPA approval. Subpart D provides standards for such approvals based on consideration of the electronic document receiving systems that the state, tribe, or local government will use to implement the electronic reporting. Additionally, § 3.1000(b) through (e) of 40 CFR part 3, subpart D provides special procedures for program revisions and modifications to allow electronic reporting, to be used at the option of the state, tribe or local government in place of procedures available under existing program-specific authorization regulations. An application submitted under the subpart D procedures must show that the state, tribe or local government has sufficient legal authority to implement the electronic reporting components of the programs covered by the application and will use electronic document receiving systems that meet the applicable subpart D requirements.

On July 19, 2017, the Illinois Environmental Protection Agency (IEPA) submitted an application titled "NPDES e-Reporting Tool" for revision to its EPA-approved program under title 40 CFR to allow new electronic reporting. EPA reviewed IEPA's request to revise its EPA-authorized Part 123—EPA Administered Permit Programs: The National Pollutant Discharge Elimination System program and, based on this review, EPA determined that the application met the standards for approval of authorized program revision/modification set out in 40 CFR part 3, subpart D. In accordance with 40 CFR 3.1000(d), this notice of EPA's decision to approve Illinois's request to revise its Part 123—EPA Administered Permit Programs: The National Pollutant Discharge Elimination System program to allow electronic reporting under 40 CFR parts 122 and 125 is being published in the **Federal Register**.

IEPA was notified of EPA's determination to approve its application

with respect to the authorized program listed above.

FEDERAL COMMUNICATIONS COMMISSION

[DA 17-724]

Opening of First Priority Filing Window for Eligible Full Power and Class A Television Stations

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This document announces that the first priority filing window for eligible full power and Class A television stations to file applications for alternate channels or expanded facilities will be open from August 9, 2017 through September 8, 2017.

DATES: August 8, 2017.

FOR FURTHER INFORMATION CONTACT:

Joyce Bernstein, Joyce.Bernstein@fcc.gov, or Kevin Harding, Kevin.Harding@fcc.gov, Video Division, Media Bureau, Federal Communications Commission.

SUPPLEMENTARY INFORMATION: Auction 1000, which was conducted pursuant to Title VI of the Middle Class Tax Relief and Job Creation Act of 2012, was completed on April 13, 2017, and the Commission initiated a transition period during which broadcast television stations that received new channel assignments in the April 13, 2017 Closing and Channel Reassignment Public Notice will be reauthorized and relicensed. The deadline for applications for construction permits consistent with the requirements of that Public Notice were due July 12, 2017.

The first priority filing window, which opens on Wednesday, August 9, 2017 and closes at 11:59 p.m. EDT on Friday, September 8, 2017, is limited to: (1) 25 reassigned stations that were granted a waiver of the July 12, 2017 filing deadline because they were "unable to construct" the specified facilities assigned to them in the Closing and Channel Reassignment Public Notice; (2) stations entitled to protection in the repacking process that are predicted to experience a loss of population served in excess of one percent as a result of the auction repacking process; and (3) Class A stations that did not receive protection and were displaced in the repacking

process. Applications filed by stations that received a waiver of the July 12, 2017 filing deadline and displaced Class A stations are exempt from a filing fee.

Eligible stations may file applications for expanded facilities that qualify as a minor change under the Commission's rules, or for alternate channels which will be treated as major change applications under the Commission's rules. Applicants must protect the construction permit facilities of stations assigned to new channels, whether those stations' applications have been granted or remain pending, and must also protect the facilities specified in applications that were filed before the April 2013 freeze on applications proposing to extend a station's contour. Applications filed by displaced Class A stations must also demonstrate that the proposal would not cause interference to a low power television or translator facility previously authorized or proposed. A station that files an application that is incomplete or defective will be afforded an opportunity to submit an amendment to correct any defects, and failure to correct will result in dismissal of the application. If an application filed by (1) a station that was unable to construct the facilities specified in the Closing and Channel Reassignment Public Notice or (2) a displaced Class A station is dismissed, then the station must file a new application within 15 days of dismissal and pay the requisite filing fee.

Applications filed during the first priority filing window will be treated as filed on the last day of the window for purposes of determining mutual exclusivity. Stations with mutually exclusive applications will be notified and given a 90-day period to resolve their mutual exclusivity by proposing a technical solution or settlement in an amendment to their pending applications.

Federal Communications Commission.

Chief, Video Division, Media Bureau.
