

Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for these reviews may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—On July 7, 2017, the Commission determined that the domestic interested party group response to its notice of institution (82 FR 16226, April 3, 2017) of the subject five-year reviews was adequate and that the respondent interested party group response was inadequate. The Commission did not find any other circumstances that would warrant conducting full reviews.¹ Accordingly, the Commission determined that it would conduct expedited reviews pursuant to section 751(c)(3) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(3)).

For further information concerning the conduct of these reviews and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Staff report.—A staff report containing information concerning the subject matter of the reviews will be placed in the nonpublic record on August 11, 2017, and made available to persons on the Administrative Protective Order service list for these reviews. A public version will be issued thereafter, pursuant to section 207.62(d)(4) of the Commission's rules.

Written submissions.—As provided in section 207.62(d) of the Commission's rules, interested parties that are parties to the reviews and that have provided individually adequate responses to the notice of institution,² and any party other than an interested party to the review may file written comments with the Secretary on what determination the Commission should reach in the reviews. Comments are due on or before September 22, 2017 and may not contain new factual information. Any person that is neither a party to the five-year review nor an interested party may submit a brief written statement (which shall not contain any new factual

information) pertinent to the reviews by September 22, 2017. However, should the Department of Commerce extend the time limit for its completion of the final results of its reviews, the deadline for comments (which may not contain new factual information) on Commerce's final results is three business days after the issuance of Commerce's results. If comments contain business proprietary information (BPI), they must conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's rules with respect to filing were revised effective July 25, 2014. See 79 FR 35920 (June 25, 2014), and the revised Commission Handbook on E-filing, available from the Commission's Web site at <https://edis.usitc.gov>.

In accordance with sections 201.16(c) and 207.3 of the rules, each document filed by a party to the reviews must be served on all other parties to the reviews (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Determinations.—The Commission has determined these reviews are extraordinarily complicated and therefore has determined to exercise its authority to extend the review period by up to 90 days pursuant to 19 U.S.C. 1675(c)(5)(B).

Authority: These reviews are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: August 3, 2017.

Lisa R. Barton,

Secretary to the Commission.

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor (Secretary) determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M-2017-014-C.

Petitioner: Gibson County Coal, LLC, 3455 S 700 W, Owensville, Indiana 47665.

Mine: South Mine, MSHA I.D. No. 12-02388, located in Gibson County, Indiana.

Regulation Affected: 30 CFR 75.382 (Mechanical escape facilities).

Modification Requested: The petitioner requests a modification of the existing standard to permit the use of the slope belt conveyor as a mechanical escape facility at the South Mine. The petitioner states that:

a. Mine No. 1 extracts coal from the Springfield No. 5 coal seam by continuous mining method. The coal seam is intersected by a vertical shaft with cage hoist facility and by a dual compartment slope that contains a slope car hoist facility in the lower track compartment and a belt conveyor in the isolated upper compartment. Escapeways, as required in 30 CFR 75.380(a), are connected to these hoist facilities as required in 30 CFR 75.380(i)(1) and (i)(2).

b. Rope and drum hoists used as mechanical escape facilities at these locations are subject to maintenance and/or conditions that could interfere with the operation of the facility for extended periods of time. The availability of a third mechanical escape facility (slope belt conveyor) provides an additional layer of safety for the miners and enhances compliance with escapeway regulations in that there will be an additional escape facility readily available during normal hoist operations. Additionally, the use of the slope belt conveyor as a mechanical escape facility provides the most efficient means to evacuate miners in the event of a mine emergency. The slope belt conveyor provides a nonstop conveyance on which the miners can exit the mine without the delay of having to wait on the limited capacity of the slope car as it makes a roundtrip in and out of the mine. At a speed of 140 feet per minute, the slope belt conveyor can evacuate 100 miners in approximately 19 minutes. The slope car hoist requires approximately 126 minutes to evacuate 100 miners.

The petitioner further states that the use of the slope belt conveyor as a mechanical escape facility at the South Mine will be conditioned upon compliance with the following:

(1) The slope belt conveyor will be equipped with an automatic braking system which will prevent the belt from reversing direction if power is lost. The drive pulley shafts are provided with a
