The deviation is necessary to facilitate routine maintenance. This deviation allows the bridge to remain in the closed-to-navigation position.

**DATES:** The deviation is effective from 4 a.m. through 5:30 a.m. on August 27, 2017.

**ADDRESSES:** The docket for this deviation, [USCG-2017-0806] is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH". Click on Open Docket Folder on the line associated with this deviation.

Under this temporary deviation, the bridge will remain in the closed-to-navigation position from 4 a.m. through 5:30 a.m. on August 27, 2017. The drawbridge has two spans, each with double-leaf bascule draws, and both spans have a vertical clearance in the closed-to-navigation position of 65 feet above mean high water.

The Atlantic Intracoastal Waterway, Southern Branch of the Elizabeth River is used by a verity of vessels including recreational vessels, tug and barge traffic, small fishing vessels, and small commercial vessels. The Coast Guard has carefully considered the nature and volume of vessel traffic on the waterway in publishing this temporary deviation.

The channel will be closed to all traffic from 4 a.m. through 4:30 a.m. and from 5 a.m. through 5:30 a.m. on August 27, 2017. Vessels able to pass through the bridge in the closed position from 4:30 a.m. through 5 a.m. may do so. The bridge spans will not be able to open in case of an emergency and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterway through our Local Notice and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

In this rulemaking, EPA is approving certain changes related to the District's stationary source emissions monitoring and reporting requirements in Regulation 1.06<sup>1</sup> in the March 22, 2011, and April 20, 2011, SIP revisions. This regulation provides the District with the authority to require emissions monitoring at stationary sources and requires certain sources to maintain emissions records and provide annual emissions statements to the District. It does not impose any emissions limits or control requirements on any emissions source. The March 22, 2011, submission also included changes to Jefferson County Regulation 1.02—*Definitions*; Regulation 3.01—*Ambient Air Quality Standards*; Regulation 3.02—*Applicability of Ambient Air Quality Standards*; Regulation 3.03—*Definitions*; Regulation 3.04—*Ambient Air Quality Standards*; and Regulation 3.05—*Methods of Measurement*. EPA approved these changes, with the exception of the requested addition of certain definitions in Regulation 1.02, on December 6, 2016 (81 FR 87815).<sup>2</sup> The March 22, 2011, submission also included changes to Regulation 1.07—*Emissions During Startups, Shutdowns,*

<sup>1</sup> In 2003, the City of Louisville and Jefferson County governments merged and the "Jefferson County Air Pollution Control District" was renamed the "Louisville Metro Air Pollution Control District." However, each of the regulations in the Jefferson County portion of the Kentucky SIP still has the subheading "Air Pollution Control District of Jefferson County." Thus, to be consistent with the terminology used in the SIP, EPA refers throughout this notice to regulations contained in Jefferson County portion of the Kentucky SIP as the "Jefferson County" regulations.

<sup>2</sup> EPA did not approve the addition of definitions for the terms "acute noncancer effect," "cancer," "carcinogen," and "chronic noncancer effect," because these definitions are not related to the National Ambient Air Quality Standards (NAAQS). See 81 FR 87815.

*Malfunctions and Emergencies*. EPA approved the changes to Regulation 1.07 on June 10, 2014 (79 FR 33101). The April 20, 2011, submission revises only Regulation 1.06.

## II. EPA's Analysis of Kentucky's SIP Revisions

### A. March 22, 2011, Submittal

The March 22, 2011, SIP submission contains a version of Regulation 1.06 adopted by the District on June 21, 2005 (referred to as "Version 7" by the District) and a version of Regulation 1.06 adopted by the District on September 21, 2005 (referred to as "Version 8"). The version currently incorporated into the SIP is referred to as "Version 6" (District effective on December 15, 1993). See 65 FR 53660 (October 23, 2001). Collectively, Versions 7 and 8 change the heading of Regulation 1.06 to "Stationary Source Self-Monitoring, Emissions Inventory Development, and Reporting," and change aspects of Section 1—"In Stack Self-Monitoring and Reporting" (including a change in the title to "In-Stack Self-Monitoring and Reporting"); Section 2—"Ambient Air Monitoring"; and Section 3—"Emissions and Related Data Reporting" (including a change in the title to "Provisions for Section 4 and Section 5 Emissions Data"). The submission adds four new sections: Section 4—"Emissions Data for Criteria Pollutants, HAPs, and Ammonia"; Section 5—"Enhanced Emissions Data for Toxic Air Contaminants"; Section 6—"Certification by a Responsible Official"; and Section 7—"Confidentiality and Open Records Requirements." The changes to the heading of Regulation 1.06, the changes to Sections 1 and 2, and the addition of Sections 6 and 7 are administrative in nature. The changes to Section 3 modify and add provisions regarding emissions reporting data requirements, methods of emissions calculations, and stationary source emissions statements, and remove outdated reporting dates; the addition of Section 4 details requirements for submitting emissions statements on an annual basis for particulate matter, sulfur dioxide, carbon monoxide, nitrogen dioxide, lead, ozone precursor emissions of volatile organic compounds and oxides of nitrogen, ammonia, and hazardous air pollutants; and Section 5 contains requirements for enhanced emissions statements for listed "toxic air contaminants." Because the reporting of toxic air contaminants is not related to the National Ambient Air Quality Standards (NAAQS) for the criteria pollutants, EPA is not acting on Section
