[Project No. 2100-180—California]

California Department of Water Resources; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC's) regulations, 18 Code of Federal Regulations Part 380, the Office of Energy Projects has reviewed an application filed by the California Department of Water Resources on May 17, 2017, and supplemented June 16 and June 20, 2017, to permanently reroute three existing primary transmission lines at the Feather River Project No. 2100 between the Hyatt Pumping-Generating Plant and the Table Mountain Substation. The proposal would allow California Department of Water Resources to continuously deliver electricity along a different route away from repair activities at the project's damaged main spillway and emergency spillway area. The Feather River Project is located on the Feather River in Butte County, California.

Staff prepared an environmental assessment (EA) for the application which analyzes the potential environmental effects of approving the requested transmission line modification. In the EA, staff concludes that such an approval, with specified environmental protection measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the EA is available for review at the Commission's Public Reference Room or it may be viewed on the Commission's Web site at www.ferc.gov using the eLibrary link. j. On June 1, 2017, Nevada Hydro filed a request that the Commission waive certain of the pre-filing consultation requirements of Part 5 of the Commission's regulations for the proposed LEAPS Project to include: pre-filing scoping;¹ comments and information or study requests; the preparation of and comments on a proposed study plan; resolution of disputes over studies;² and notice of the applicant's intent to file a draft license application.³ Nevada Hydro's justification for the waivers is that a Final Environmental Impact Statement, prepared by Commission staff, was issued in 2007 for essentially the same project proposal under P–11858 and the consultation on the current project proposal that has already occurred meets the intent of the Commission's pre-filing consultation requirements.

With this notice we are soliciting comments on Nevada Hydro's notice of intent and request to waive pre-filing requirements. All comments should be sent to the address in paragraph l below.
