1. The proposed Camp McDowell Project would consist of: (1) An existing 157-foot-long, 13.5-foot-high concrete/masonry dam consisting of: (a) A 113-foot-long spillway with a crest elevation of 513.5 feet North American Vertical Datum of 1927 (NAVD 27); (b) a 9-foot-long non-overflow section with a 5-foot-diameter low level gated release pipe; and (c) a 35-foot-long non-overflow section; (2) an existing 10-acre impoundment (Clear Creek) at normal water surface elevation of 513.5 feet; (3)

a 26-foot-wide, 1.3-foot-deep gated intake located on top of the spillway protected by a 6-foot-high, 30-foot-wide steel trash rack with 6-inch clear bar spacing; (4) a 27-foot-long, 6-foot-wide, concrete sluiceway; (5) a concrete powerhouse, located at the base of the dam, containing one 50-foot-long by 9-foot-diameter Archimedes screw turbine-generator unit (ASG unit), rated at 140 kW; (6) a water-level sensor, and automatic sluice gate controller; (7) a 650-foot-long, 460-volt, above-ground transmission line; and (8) appurtenant facilities. The estimated annual generation of the proposed Camp McDowell Project would be about 950 megawatt-hours. The applicant proposes to operate the project in a run-of-river mode. There are no federal or state lands associated with the project.

m. Due to the applicant's close coordination with federal and state agencies during the preparation of the application, studies completed during pre-filing consultation, and small size and location of the project, we intend to waive scoping and expedite the exemption process. Based on a review of the application and resource agency consultation letters filed to date, Commission staff intends to prepare a single environmental assessment (EA). Commission staff determined that the issues that need to be addressed in its EA have been adequately identified during the pre-filing period, which included a public scoping meeting and site visit, and no new issues are likely to be identified through additional scoping. The EA will assess the potential effects of project construction and operation on geology and soils, aquatic, terrestrial, threatened and endangered species, recreation and land use, aesthetic, and cultural and historic resources.

n. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the eLibrary link. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

All filings must (1) bear in all capital letters the title PROTEST, MOTION TO INTERVENE, NOTICE OF INTENT TO FILE COMPETING APPLICATION, COMPETING APPLICATION, COMMENTS, REPLY COMMENTS, RECOMMENDATIONS, or TERMS AND CONDITIONS; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005.
