

IV. Method To Ensure an Equivalent or Greater Level of Safety

According to PCCA, exempting power and communication contractors from ELD requirements would not compromise the safety of drivers in the industry in any way. All rules related to the short-haul exemption would still apply, and drivers would continue to comply with written RODS requirements when short-haul limitations are exceeded. Unlike long-haul interstate truckers, drivers in the construction industry meet a variety of job functions and spend the vast majority of their time on a jobsite within a short distance of their daily assembly point, not on public roads and highways. Power and communication contractors would continue to meet all other HOS requirements overseen by FMCSA.

PCCA believes an equivalent level of safety will be achieved if drivers in the power and communication construction industry are exempt from ELD requirements as described above.

A copy of PCCA's application for exemption is available for review in the docket for this notice.

Issued on: September 8, 2017.

Associate Administrator for Policy.
