SUPPLEMENTARY INFORMATION: EDF Renewable Energy has applied for a Right-of-Way (ROW) from the BLM to construct, operate, maintain, and decommission a 500 megawatt (MW) solar photovoltaic facility near Desert Center, Riverside County, California. The ROW application area comprises about 4,200 acres, with a proposed project footprint of about 3,400 acres. The proposed project also includes construction of a 6.7-mile single circuit 230 kilovolt generation interconnection (gen-tie) transmission line connecting the project to the Southern California Edison (SCE) Red Bluff Substation.

The BLM is also considering an amendment to the CDCA Plan that

would be necessary to authorize the project. This is a joint EIS/EIR for compliance with NEPA and CEQA. Riverside County is the lead agency under CEQA.

This Project application was originally submitted in 2007 as the Palen Solar Power Project (PSPP) by Palen Solar I, LLC (PSI), a wholly owned subsidiary of Solar Millennium. The PSPP was proposed as a solar trough project, and was the subject of an EIS under NEPA. The BLM, pursuant to its obligations under FLPMA and NEPA, published a Draft EIS, followed by a Proposed Resource Management Plan Amendment (RMP) and Final EIS on May 13, 2011 (76 FR 28064).

Before the BLM issued a Record of Decision (ROD), PSI informed the BLM that it would not construct the Project due to bankruptcy. As a result, the BLM did not issue a ROD, did not amend the RMP, and did not issue a ROW grant for the PSPP.

On June 21, 2012, the bankruptcy court approved the transfer of the application from PSI to Palen Solar III, LLC (PSIII). BrightSource Energy Inc., (BSE) then acquired all rights to PSIII at auction. PSIII submitted a revised ROW application to the BLM for the Palen Solar Electricity Generating System Project (PSEGS), a 500 MW concentrating solar power tower technology facility and single-circuit 230 kV gen-tie line. On July 27, 2013, the BLM issued a Draft Supplemental EIS and Plan Amendment to evaluate the potential additional environmental impacts caused by PSEGS. As part of the State permitting process, the California Energy Commission evaluated the PSEGS under CEQA, and issued Preliminary and Final Staff Assessments for the amended project in June and November of 2013, respectively.

The BLM did not issue a Final Supplemental EIS for the PSEGS Project because BSE and its partner, Abengoa Solar Inc., abandoned the State authorization proceedings at the California Energy Commission. In December 2015, EDF Renewable Energy acquired the PSEGS project. EDF Renewable Energy has submitted a revised ROW application for the Proposed Project, which is analyzed in
