Environmental topics addressed in the Final NPEIS include air quality, noise, land use and planning, geology and soils, water resources, biological resources, cultural resources, aesthetics/visual resources, infrastructure, socioeconomic resources, hazardous waste and materials, and climate change. Best management practices and mitigation measures that could alleviate environmental effects have been considered and are included where relevant within the Final NPEIS. The proposed alternatives do not have natural or depletable resource requirements because they are changes in policy or regulation that do not involve any physical activities for which resources would be required. For these alternatives, no significant or unavoidable adverse impacts are anticipated.

The Final NPEIS considers comments on the Draft NPEIS, including those submitted during the public comment period that officially began on April 7, 2017 and ended on June 6, 2017, following a 60-day comment period. Appendix M provides the Draft NFIP comments with FEMA responses, and notes revisions in the Final NPEIS.

The NFIP Final NPEIS is available for viewing on the Federal eRulemaking Portal at <http://www.regulations.gov> under Docket ID FEMA–2012–0012.

SUPPLEMENTARY INFORMATION: US-CERT is responsible for performing, coordinating, and supporting response to information security incidents, which may originate outside the Federal community and affect users within it, or originate within the Federal community and affect users outside of it. Often, therefore, the effective handling of security incidents relies on information sharing among individual users, industry, state and local governments, and the Federal Government, which

may be facilitated by and through US-CERT.

US-CERT fulfills the role of the Federal information security incident center for the United States Federal Government as defined in the Federal Information Security Modernization Act of 2014. Each Federal agency is required to notify and consult with US-CERT regarding information security incidents involving the information and information systems (managed by a Federal agency, contractor, or other source) that support the operations and assets of the agency. Additional entities report incident information to US-CERT voluntarily.

Per the Federal Information Security Modernization Act of 2014, as codified in subchapter II of chapter 35 of title 44 of the United States Code, US-CERT must inform operators of agency information systems about current and potential information security threats and vulnerabilities. Per the Homeland Security Act, as amended, the NCCIC, of which US-CERT and ICS-CERT are a part, is required to be the Federal civilian interface for sharing cybersecurity risks, incidents, analysis, and warnings for federal and non-Federal entities.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
