This notice invites comment on a proposed information collection project titled *Workplace Violence Prevention Programs in NJ Healthcare Facilities*. Through nursing home administrator interviews, CDC seeks to continue measuring compliance to the state regulations for workplace violence prevention program: Violence prevention policies, reporting systems for violent events, violence prevention committee, written violence prevention plan, violence risk assessments, post incident response and violence prevention training.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To

comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

5. Assess information collection costs.

Proposed Project

Workplace Violence Prevention Programs in NJ Healthcare Facilities (OMB Control Number 0920-0914, Expiration 3/31/2018)—Extension—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The National Institute for Occupational Safety and Health (NIOSH) seeks to request an extension of it already approved information collection project to complete 20 nursing home interviews.

Healthcare workers are nearly five times more likely to become victims of violence than workers from all other industries combined. While healthcare workers are not at particularly high risk for job-related homicide, nearly 60% of

all nonfatal assaults occurring in private industry are experienced in healthcare. Six states have enacted laws to reduce violence against healthcare workers by requiring workplace violence prevention programs. However, little is understood about how effective these laws are in reducing violence against healthcare workers.

The long-term goal of the proposed project is to reduce violence against healthcare workers. The objective of the proposed study is: (1) To examine nursing home compliance with the New Jersey Violence Prevention in Health Care Facilities Act, and (2) to evaluate the effectiveness of the regulations in this Act in reducing assault injuries to

nursing home workers. Our central hypothesis is that nursing homes with high compliance with the regulations will have lower rates of employee violence-related injury.

Previously under this OMB Control number, NIOSH received OMB approval to evaluate the legislation at 50 hospitals and at 40 nursing homes, to conduct a nurse survey, and to conduct a home healthcare aide survey (HHCAS). NIOSH completed the data collection activities for the hospitals, the nurse survey, and the HHCAS. However, NIOSH only completed 20 out of 40 nursing home interviews.

NIOSH seeks to conduct face-to-face interviews with the Chairs of the

Violence Prevention Committees in 20 nursing homes (10 in New Jersey and 10 in Virginia) who are in charge of overseeing compliance efforts. The purpose of the interviews is to measure compliance to the state regulations: Violence prevention policies, reporting systems for violent events, violence prevention committee, written violence prevention plan, violence risk assessments, post incident response and violence prevention training. A contractor will conduct the interviews.

There are no costs to respondents other than their time. The total estimated burden hours are 40.
