

Rule 17Ad-22(e)(6)³⁷ further requires OCC to establish, implement, maintain and enforce written policies and procedures reasonably designed to cover its credit exposures to its participants by establishing a risk-based margin system that, among other things: (i) Considers, and produces margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market; (ii) calculates margin sufficient to cover its potential future exposure to participants in the interval between the last margin collection and the close out of positions following a participant default; and (iii) uses reliable sources of timely price data and uses procedures and sound valuation models for addressing circumstances in which pricing data are not readily available or reliable.

As described in detail above, the proposed changes are designed to ensure that, among other things, OCC's margin methodology: (i) More appropriately accounts for asymmetry in conditional variance; (ii) more appropriately models the statistical distribution of price returns, (iii) more accurately models second-day volatility forecasts; (iv) improves OCC's approach to estimating covariance and correlations between risk factors to provide for stable and sensitive correlation estimations; and (v) improves OCC's methodology related to the treatment of defaulting securities by reducing the impact that illiquid securities with discontinuous data have on default variance estimates. These methodology enhancements would be used to calculate daily margin requirements for OCC's Clearing Members. In this way, the proposed changes are designed to consider, and produce margin levels commensurate with, the risks and particular attributes of each relevant product, portfolio, and market and to calculate margin sufficient to cover its potential future exposure to participants in the interval between the last margin collection and the close out of positions following a participant default.

Moreover, the proposed changes would introduce daily updates for price data for equity products, including daily corporate action-adjusted returns of equities, ETFs, ETNs, and certain indexes. This daily price data would be obtained from a widely used and reliable industry vendor. In this way, the proposed changes would ensure that OCC uses reliable sources of timely price data in its margin methodology, which better reflect current market conditions than the current monthly

updates, thereby resulting in more accurate and responsive margin requirements.

For these reasons, OCC believes that the proposed changes are consistent with Rule 17Ad 22(e)(6).³⁸

III. Date of Effectiveness of the Advance Notice and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of: (i) The date the proposed change was filed with the Commission or (ii) the date any additional information requested by the Commission is received. OCC shall not implement the proposed change if the Commission has any objection to the proposed change.

The Commission may extend the period for review by an additional 60 days if the proposed change raises novel or complex issues, subject to the Commission providing the clearing agency with prompt written notice of the extension. A proposed change may be implemented in less than 60 days from the date the advance notice is filed, or the date further information requested by the Commission is received, if the Commission notifies the clearing agency in writing that it does not object to the proposed change and authorizes the clearing agency to implement the proposed change on an earlier date, subject to any conditions imposed by the Commission.

OCC shall post notice on its website of proposed changes that are implemented.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

SUPPLEMENTARY INFORMATION: The Computer Matching and Privacy Protection Act of 1988 (Public Law (Pub. L.) 100-503), amended the Privacy Act (5 U.S.C. 552a) by describing the conditions under which computer matching involving the Federal government could be performed and adding certain protections for persons applying for, and receiving, Federal benefits. Section 7201 of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101-508) further amended the Privacy Act regarding protections for such persons.

The Privacy Act, as amended, regulates the use of computer matching by Federal agencies when records in a system of records are matched with other Federal, State, or local government records. It requires Federal agencies involved in computer matching programs to:

(1) Negotiate written agreements with the other agency or agencies participating in the matching programs;

(2) Obtain approval of the matching agreement by the Data Integrity Boards of the participating Federal agencies;

(3) Publish notice of the matching program in the **Federal Register**;

Mary Ann Zimmerman,

Acting Executive Director, Office of Privacy and Disclosure, Office of the General Counsel.

PARTICIPATING AGENCIES:

SSA and RRB

AUTHORITY FOR CONDUCTING THE MATCHING PROGRAM:

The legal authority for SSA to conduct this matching activity is sections 1144 and 1860D-14 of the Social Security Act (Act) (42 U.S.C. 1320b-14 and 1395w-114).

PURPOSE(S):

This matching agreement establishes the conditions under which the RRB will disclose to SSA information necessary to verify an individual's self-certification of eligibility for the Extra Help with Medicare Prescription Drug Plan Costs program (Extra Help). It will also enable SSA to identify individuals who may qualify for Extra Help as part of the agency's Medicare outreach efforts.

CATEGORIES OF INDIVIDUALS:

The individuals whose information is involved in this matching program are individuals who self-certify for Extra Help or may qualify for Extra Help. SSA matches RRB's information with its Medicare Database File, which includes claimants, applicants, beneficiaries, ineligible spouses and potential claimants for Medicare Part A, Medicare Part B, Medicare Advantage Part C, Medicare Part D and for Medicare Part D prescription drug coverage subsidies.

CATEGORIES OF RECORDS:

RRB will transmit its annuity payment data monthly from its RRB-22 system of records. The file will consist of approximately 600,000 electronic records.

RRB will transmit its Post Entitlement System file daily. The number of records will differ each day, but consist of approximately 3,000 to 4,000 records each month.

RRB will transmit files on all Medicare eligible Qualified Railroad Retirement Beneficiaries from its RRB-20 and RRB-22 systems of records to report address changes and subsidy changing event information monthly. The file will consist of approximately 520,000 electronic records. The number of people who apply for Extra Help determines in part the number of records matched.

SSA's comparison file will consist of approximately 90 million records obtained from MDB.

SSA will conduct the match using each individual's Social Security number, name, date of birth, RRB claim number, and RRB annuity payment amount in both RRB and MDB files.

SYSTEM(S) OF RECORDS:

RRB will provide SSA with data from its RRB-22 system of records, *Railroad Retirement Survivors and Pension Benefits System*, last published on September 30, 2014 (79 FR 58886), and RRB-20 systems of records, *Health Insurance and Supplementary Medical Insurance Enrollment and Premium Payment System (Medicare)*, last published on May 15, 2015 (80 FR 28018).

SSA will match RRB's data with its Medicare Database (MDB) File, system of records No. 60-0321, published on July 25, 2006 (71 FR 42159), and amended on December 10, 2007 (72 FR 69723).
