

operating reserve at the end of fiscal year 2017 was \$6,950,142, which continues to exceed 6 months by a significant margin.

Accordingly, AMS is issuing this notice to announce the suspension of the fee for supervision of official inspection and weighing services of domestic grain and land carriers to Canada and Mexico performed by delegated States and/or designated agencies. According to the regulations under the USGSA, AMS may suspend any provision of the regulations in emergencies or other circumstances, which would not impair the objectives of the USGSA (7 CFR 800.2). AMS has determined that suspending supervision fees will not impair the objectives of the USGSA because the operating reserve for supervision services is sufficient to maintain the service without additional funds.

AMS will continue the suspension of the assessment fee of \$0.011 per metric ton on domestic shipments officially inspected and/or weighed, including land carrier shipments to Canada and Mexico, performed by delegated States and/or designated agencies on or after July 1, 2018 (7 CFR 800.71 Schedule B). These fees will remain suspended for one year, at which time AMS will reassess the operating reserve for supervision of official agency inspection and weighing.

Dated: May 18, 2018.

Greg Ibach,

Under Secretary, Marketing and Regulatory Programs.

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

Agency: U.S. Census Bureau.
Title: School District Review Program.
OMB Control Number: 0607-0987.
Form Number(s): NA.
Type of Request: Regular submission.
Number of Respondents: 51.
Estimated Number of Respondents: Annotation Phase: 51.
Verification Phase: 51.
Estimated Time per Response: Annotation Phase: 30 hours.
Verification Phase: 10 hours.
Estimated Burden Hours: Annotation Phase: 1,530 hours.
Verification Phase: 510 hours.
Estimated Total Burden Hours: 2,040 hours.

Needs and Uses: The School District Review Program (SDRP) is one of many voluntary geographic partnership programs at the U.S. Census Bureau. The SDRP collects school district information and boundaries to update the Census Bureau's geographic database of addresses, streets, and boundaries on an annual basis. The Census Bureau uses its geographic database to tie demographic data from surveys and the decennial census to locations and areas, such as cities, school districts, and counties. To tabulate statistics by localities, the Census Bureau must have accurate addresses and boundaries.

The boundaries collected in SDRP and other geographic programs will create census blocks, which are the building blocks for all Census Bureau geographic boundaries. Legal, administrative, and statistical geographies are all used to define block boundaries. While the geographic programs differ in requirements, time frame, and participants, SDRP and the other geographic programs all follow the same basic process:

1. The Census Bureau invites eligible participants to take part in the program. For SDRP, the Census Bureau invites the following state officials: Title I coordinators and mapping coordinators. The Title I Coordinator designates the mapping coordinator for the SDRP.

2. If they elect to join the program, the state officials receive a copy of the school district boundaries that the Census Bureau has on file. The Census Bureau also provides SDRP participants with free customized mapping software to facilitate their work.

3. Participants review the boundaries in the Census Bureau-provided digital maps and update them if needed. For SDRP, the state government participants reach out to contacts in school districts across their state to collect updates. State officials will provide the Census Bureau with updates as well as corrections to the federal Local

Education Agency (LEA) identification numbers, school district boundaries, school names, grade ranges, and levels for which each school district is financially responsible.

4. Participants return their updates to the Census Bureau. In the SDRP, this is known as the Annotation Phase.

5. The Census Bureau updates its geographic database with boundary updates from participants.

6. The Census Bureau creates maps from its geographic database and sends them to participants for final review. In the SDRP, this is known as the Verification Phase.

7. The Census Bureau uses the newly updated and verified boundaries to tabulate statistics, in particular the Small Area Income and Poverty Estimates (SAIPE) Program's estimates of the number of families with children, aged 5 through 17, in poverty for each school district for the U.S. Department of Education. The U.S. Department of Education uses these estimates to allocate more than \$14 billion in Title I funding annually. These Census Bureau estimates are the basis of the Title I allocation for each school district. The SDRP is of vital importance for each state's allocation of funds under Title I of the Elementary and Secondary Education Act (ESEA) as amended by Every Student Succeeds Act of 2015, Public Law 114-95.

The National Center for Education Statistics (NCES) sponsors the SDRP. The NCES identifies a Title I coordinator for each state and the District of Columbia, and the Census Bureau works with the Title I coordinator on identifying a mapping coordinator in each state to work with the Census Bureau to implement this work. The mapping coordinator collects updates from local school districts, state education officials, county planners, and state data centers, and ensures that submissions are completed within the SDRP's time frame.

The SDRP encompasses Type 1 and Type 2 school districts as defined by the NCES. Type 1 is a local school district that is not a component of a supervisory union. Type 2 is a local school district component of a supervisory union sharing a superintendent and administrative services with other local school districts.

The SDRP consists of two phases—the Annotation Phase and the Verification Phase—described below:

Annotation Phase

In the Annotation Phase, mapping coordinators gather school district updates from school district superintendents and other state officials
