

ensure there are a sufficient number of State quality control reviewers staffed in order to complete cases within prescribed time periods?

6. Federal regulations at 7 CFR 275.23(b)(iii) require FNS to adjust a State agency's regressed error rate for failing to complete 98 percent of its required sample size. FNS is considering a proposal to increase the adjustment as the current formula may not effectively deter mitigation strategies that encourage error prone cases to be dropped. What factors should FNS consider in adjusting a State agency's regressed error rate for incomplete cases?

7. In both OIG's review of SNAP's QC system and FNS' own QC integrity reviews it was found that one tactic used to minimize the reporting of errors was to drop cases that were subject to QC review. What policies or procedures should FNS consider to ensure that only cases that cannot be verified are dropped while also discouraging the over-use of dropping cases?

8. FNS uses a two-step process in order to determine a case's final payment error amount, referred to as Comparison I and Comparison II. In an audit, USDA's Office of Inspector General expressed concerns that the existing two-step process does not conform to regulatory requirements and that it does not accurately measure errors because Comparison II is not applied to all cases. This inconsistency raises concerns of underreporting payment errors. What recommendations should FNS consider in revising the use of Comparison I and Comparison II to reflect a more accurate account of a sampled case's payment error amount?

9. FNS is interested in recommendations that incentivize quality control reviewers to accurately report case results. Performance requirements that focus exclusively on timeliness of the case reviews without any qualitative measure may inadvertently lead to inaccurate case results. What factors should FNS consider in establishing qualitative metrics for quality control case reviews?

10. What concerns or barriers, if any, would exist if FNS were to mandate the use of the SNAP Quality Control System (SNAPQCS) as a means of reporting case results and documentation to FNS for all QC Worksheets? This is based on an assumption that a State would retain the option to maintain its own internal quality control system, provided that case results were reported to SNAPQCS.

11. Are there any data elements that FNS should consider collecting through the quality control system as part of the FNS form 380-1 in order to better understand SNAP case record information and/or patterns over time or across States? This includes information that would further FNS's knowledge of potential bias in the payment error rates.

12. Are there additional recommendations FNS should consider to encourage a greater use of technology to enhance the accuracy of case reviews in QC?

13. FNS is interested in improving the transparency of the QC process. What factors should FNS consider if FNS were to require all State QC procedures be in writing and submitted to FNS as part of an annual state plan?

14. What factors should FNS consider in revising the current corrective action planning requirement as a result of payment errors, incomplete cases, or negative case actions?
