EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA

Abstract: Section 609 of the Clean Air Act Amendments of 1990 (Act) provides general guidelines for the servicing of motor vehicle air conditioners (MVACs). It states that "no person repairing or servicing motor vehicles for consideration may perform any service on a motor vehicle air conditioner involving the refrigerant for such air conditioner without properly using approved refrigerant recycling equipment and no such person may perform such service unless such person has been properly trained and certified." In 1992, EPA developed regulations under section 609 that were published in 57 FR 31240, and codified at 40 CFR Subpart B (Section 82.30 *et seq.*). The information required to be collected under the section 609 regulations is: Approved refrigerant handling equipment; approved independent standards testing organizations; technician training and certification; and certification, reporting and recordkeeping.

Form Numbers: None.

Respondents/affected entities: The following is a list of NAICS codes for organizations potentially affected by the information requirements covered under this ICR. It is meant to include any establishment that may service or maintain motor vehicle air conditioners.

- 4411 Automobile Dealers
- 4413 Automotive Parts, Accessories, and Tire Stores
- 44711 Gasoline Stations with Convenience Stores
- 8111 Automotive Repair and Maintenance
- 811198 All Other Automotive Repair and Maintenance

Other affected groups include independent standards testing organizations and organizations with technician certification programs.

Respondent's obligation to respond: Mandatory (40 CFR 82.36, 82.38, 82.40, 82.42).

Estimated number of respondents: 45,902 (per year).

Frequency of response: On occasion, biennially, only once.

Total estimated burden: 4,130 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$218,009 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 34 hours in the total estimated respondent burden compared with the ICR currently approved by

OMB. This decrease is due in part to a decrease in the number of new technician certifications and the time allotted for maintenance of the technician certification records. In this ICR EPA estimates the number of new technician certifications to be 40,000 per year, a decrease from the 50,000 estimated in the previous ICR, based on information provided by the largest technician certification program. The maintenance of these records is estimated to require 0.067 clerical work hours per certification, a decrease from 0.08 hours in the previous ICR, recognizing the move towards electronic recordkeeping which may be more efficient. Another reason for the burden decrease is a decrease in the market for small containers of CFC-12 refrigerant. In this ICR, EPA estimates that the number of purchases for resale only by uncertified purchasers of small cans will be 50% less than in the previous ICR, or approximately 69 purchases, because EPA estimates that there has been at least a 50% reduction in the CFC-12 vehicle fleet since 2015.

Dated: May 23, 2018.

Cynthia A. Newberg,

Director, Stratospheric Protection Division.
