II. Background

FMCSA received applications from 14 individuals who requested an exemption from the FMCSRs prohibiting persons with ITDM from operating a CMV in interstate commerce.

FMCSA has evaluated the eligibility of these applicants and concluded that granting these exemptions would not provide a level of safety that would be equivalent to or greater than, the level of safety that would be obtained by complying with the regulation 49 CFR 391.41(b)(3).

III. Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption if it finds such an exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such an exemption.

The Agency's decision regarding these exemption applications is based on the eligibility criteria, the terms and conditions for Federal exemptions, and an individualized assessment of each applicant's medical information provided by the applicant.

IV. Conclusion

The Agency has determined that these applicants do not satisfy the criteria eligibility or meet the terms and conditions of the Federal exemption and granting these exemptions would not provide a level of safety that would be equivalent to or greater than, the level of safety that would be obtained by complying with the regulation 49 CFR 391.41(b)(3). Therefore, the 14 applicants in this notice have been denied exemptions from the physical qualification standards in 49 CFR 391.41(b)(3).

Each applicant has, prior to this notice, received a letter of final disposition regarding his/her exemption

request. Those decision letters fully outlined the basis for the denial and constitutes final action by the Agency. This notice summarizes the Agency's recent denials as required under 49 U.S.C. 31315(b)(4) by periodically publishing names and reasons for denial.

The following six applicants have had more than one hypoglycemic episode requiring hospitalization or the assistance of others, or has had one such episode but has not had one year of stability following the episode:

Anthony D. Anderson (MN)
Austin T. Brooks (MO)
Joshua G. Christensen (NC)
Alan C. Hageman (IA)
James Kopec (PA)
Samuel A. Rosseau (MA)

The following five applicants had other medical conditions making the applicant otherwise unqualified under the Federal Motor Carrier Safety Regulations:

Eugene C. Arnett (WI)
Donald L. Conklin (IN)
Steven C. Kasten (IL)
Daniel R. Leon (CO)
Lee H. Watkins (OH)

The following applicant, Anthony L. Golden (DE), did not have endocrinologists willing to make statements that he is able to operate CMVs from a diabetes standpoint.

The following applicant, Marty G. Niles (MT), had other miscellaneous reasons making the applicant otherwise unqualified under the Federal Motor Carrier Safety Regulations.

The following applicant, Robert J. Louis (LA), has peripheral neuropathy or circulatory insufficiency of the extremities likely to interfere with the ability to operate a CMV.

SUMMARY: FMCSA announces its decision to renew exemptions for 133 individuals from its prohibition in the Federal Motor Carrier Safety Regulations (FMCSRs) against persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. II. Background

On May 29, 2018, FMCSA published a notice announcing its decision to renew exemptions for 133 individuals from the insulin-treated diabetes mellitus prohibition in 49 CFR 391.41(b)(3) to operate a CMV in interstate commerce and requested comments from the public (83 FR 24581). The public comment period

ended on June 28, 2018, and no comments were received.

As stated in the previous notice, FMCSA has evaluated the eligibility of these applicants and determined that renewing these exemptions would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

The physical qualification standard for drivers regarding diabetes found in 49 CFR 391.41(b)(3) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control.

III. Discussion of Comments

FMCSA received no comments in this preceding.

In accordance with 49 U.S.C. 31136(e) and 31315, the following groups of drivers received renewed exemptions in the month of June and are discussed below:
