SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering amending License Condition 11.3(C) of License SUA-1601 issued to Strata. As required by part 51 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC prepared a final EA (ADAMS Accession No. ML17360A222). Based on the results of the final EA, described as follows, the NRC has determined not to prepare an environmental impact statement (EIS) for the amendment, and is issuing a FONSI.

II. Environmental Assessment

Description of the Proposed Action

The proposed action would amend License Condition 11.3(C) of Strata's Ross license. Strata's amendment request (ADAMS Accession No. ML17103A262) would reduce the number of monitoring wells in the designated underlying aquifer.

Need for the Proposed Action

The proposed action would reduce Strata's burden of routine monitoring of low-yielding wells.

Environmental Impacts of the Proposed Action

The NRC assessed the environmental impacts to ground water as a result of amending License Condition 11.3 (C) and determined that there would be no significant impact to ground-water quality. The NRC determined the proposed changes to the License Condition—reduction in the number of monitoring wells in the underlying aquifer within MU1 and MU2—would still maintain Strata's ability to identify vertical exclusions into the underlying aquifer at MU2 where the unit has the potential to transmit water.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the NRC staff considered denial of the proposed action (*i.e.*, the "no-action" alternative). The No-Action Alternative would mean that the NRC would not approve the requested change to License Condition 11.3 (C). The No-Action alternative would result in Strata operating the Ross project as currently licensed, thus the impacts would be the same as those already considered in the Ross Supplemental EIS and the EA prepared for License Amendment No. 7 (ADAMS Accession Nos. ML14056A096 and ML17191A371, respectively).

Agencies and Persons Consulted

On December 01, 2017, the NRC staff sent a copy of the draft EA to the Wyoming Department of Environmental Quality (DEQ) for their review and comment (ADAMS Accession No. ML17335A567). The Wyoming DEQ responded on January 2, 2018, with no comments on the draft EA (ADAMS Accession No. ML18003A749).

III. Finding of No Significant Impact

Based on its review of the proposed action, and in accordance with the requirements in 10 CFR part 51, the NRC staff has determined that amending License Condition 11.3(C) for the Ross ISR project would not significantly

affect ground-water quality. The NRC staff has determined that pursuant to 10 CFR 51.31, preparation of an EIS is not required for the proposed action and, pursuant to 10 CFR 51.32, a FONSI is appropriate.

On the basis of the final EA, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an EIS for the proposed action.

Dated at Rockville, Maryland, this 23rd day of January 2018.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-82571; File No. SR-LCH SA-2017-013]

Self-Regulatory Organizations; LCH SA; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change To Adopt LCH SA's Wind Down Plan

January 23, 2018.

On December 7, 2017, Banque Centrale de Compensation, which conducts business under the name LCH SA ("LCH SA"), filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder² a proposed rule change to

adopt an updated wind down plan (the "WDP"). (File No. SR-LCH SA-2017-013). The proposed rule change was published for comment in the **Federal Register** on December 19, 2017.³ To date, the Commission has not received comments on the proposed rule change.

Section 19(b)(2) of the Act⁴ provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate, if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day from the publication of notice of filing of this proposed rule change is February 2, 2018.

The Commission is extending the 45-day time period for Commission action on the proposed rule change. LCH SA proposes to adopt an updated WDP. The Commission finds it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider LCH SA's proposed rule change.

Accordingly, the Commission, pursuant to Section 19(b)(2)⁵ of the Act, designates March 19, 2018, as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR-LCH SA-2017-013).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶
