

buildings, per the above definition, including but not limited to irrigation systems, fire suppression systems, cooling towers, water features and data centers

- Materials used in plumbing systems, their resistance to corrosion, their ability to maintain structural integrity, and their interaction with contaminants and treatment chemicals
- System operation and maintenance, and occupant water use
- Water quality conditions at point of entry into the building
- Data needed for design and operation, including water demand assumptions
- Models for designing new systems and evaluating existing systems

II. Request for Information

NIST requests information from the public regarding measurement science needs that must be addressed to inform future code revisions, green building standards, and guidance documents in ways that enable safe, reliable and efficient plumbing systems in buildings. Responses to this RFI will assist NIST in its execution of a project to investigate approaches that can reduce water and energy consumption and reduce or prevent water quality problems by informing improvements in plumbing system design, codes and standards.

Respondents are encouraged—but are not required—to respond to each question and to present their answers after each question. The following questions cover the major areas about which NIST seeks comment. Respondents may organize their submissions in response to this RFI in any manner, and all responses that comply with the requirements listed in the **DATES** and **ADDRESSES** sections of this RFI will be considered.

Attachments will be accepted in plain text, Microsoft Word, or Adobe PDF formats. Comments sent by any method other than those specified in this notice, to any address or individual other than those specified in this notice, or received after the end of the comment period, may not be considered. Comments containing references, studies, research, and other empirical data that are not widely published should include copies or electronic links of the referenced materials.

All submissions, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. NIST reserves the right to publish comments publicly, unedited and in their entirety. Sensitive personal information, such as account numbers

or Social Security numbers, or names of other individuals, should not be included. Submissions will not be edited to remove any identifying or contact information. Do not submit confidential business information, or otherwise sensitive or protected information. Comments that contain profanity, vulgarity, threats, or other inappropriate language or content will not be considered.

NIST is interested in receiving information from the stakeholder community to answer the following questions:

(1) What are the most important issues to design and operate safe, healthy, reliable, and efficient plumbing systems?;

(2) In the context of the core issues listed above or any other issues identified in this notice, what are the research needs that should be considered in developing this research agenda?;

(3) Is there any other information respondents want to provide regarding this effort?

Authority: 15 U.S.C. 272(b)(10).

Kevin A. Kimball,
Chief of Staff.

National Oceanic and Atmospheric Administration

RIN 0648–XG525

Fisheries of the Caribbean; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 57 Assessment Webinar II for Caribbean spiny lobster.

SUMMARY: The SEDAR 57 stock assessment process for Caribbean spiny lobster will consist of a Data Workshop, a series of data and assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 57 Assessment Webinar II will be held October 24, 2018, from 1 p.m. to 3 p.m. Eastern Time.

ADDRESSES:

Meeting address: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should

contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; *phone:* (843) 571–4366; *email:* julie.neer@safmc.net

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

1. Using datasets and initial assessment analysis recommended from the Data Webinar, panelists will employ assessment models to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions.

2. Participants will recommend the most appropriate methods and configurations for determining stock

status and estimating population parameters.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 4, 2018.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting (webinar).

SUMMARY: The Pacific Fishery Management Council's (Council) Ad Hoc Ecosystem Workgroup (EWG) will hold a meeting, which is open to the public.

DATES: The webinar meeting will be held on Thursday, October 25, 2018, from 1:30 p.m. to 5:30 p.m. (Pacific Daylight Time) or until business for the day has been completed.

ADDRESSES: The meeting will be held via webinar. A public listening station is available at the Pacific Council office (address below). To attend the webinar (1) join by visiting this link <http://>

www.gotomeeting.com/online/webinar/join-webinar, (2) enter the Webinar ID: 632-761-819, and (3) enter your name and email address (required). After logging in to the webinar, please (1) dial this TOLL number +1 (415) 655-0052 (not a toll-free number), (2) enter the attendee phone audio access code 911-302-407, and (3) then enter your audio phone pin (shown after joining the webinar). **Note:** We have disabled Mic/Speakers as an option and require all participants to use a telephone or cell phone to participate. Technical Information and system requirements: PC-based attendees are required to use Windows® 7, Vista, or XP; Mac®-based attendees are required to use Mac OS® X 10.5 or newer; Mobile attendees are required to use iPhone®, iPad®, Android™ phone or Android tablet (See <https://www.gotomeeting.com/webinar/ipad-iphone-android-webinar-apps>). You may send an email to Mr. Kris Kleinschmidt at Kris.Kleinschmidt@noaa.gov or contact him at 503-820-2280, extension 411 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220.

FOR FURTHER INFORMATION CONTACT: Dr. Kit Dahl, Pacific Council; telephone: (503) 820-2422.

SUPPLEMENTARY INFORMATION: The EWG will discuss the contents of its report to the Council in response to preliminary recommendations from the Council's Ad Hoc Climate Scenarios Investigation Committee. The EWG will also plan tasks and work product in connection with the Fishery Ecosystem Plan five-year review and the Climate and Communities Initiative.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt, (503) 820-2411, at least 10 business days prior to the meeting date.

Dated: October 4, 2018.

Tracey L. Thompson,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

RIN 0648-XG538

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Scallop Committee to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Wednesday, October 24, 2018 at 9 a.m.

ADDRESSES: The meeting will be held at the Hilton Garden Inn, 100 Boardman Street, Boston, MA 02128; phone: (617) 567-6789.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Scallop Committee will review Framework (FW) 30 alternatives and analyses. The primary focus of this meeting will be to provide input on the range of specification alternatives. FW 30 will set specifications including ABC/ACLs, days-at-sea, access area allocations, total allowable catch for the Northern Gulf of Maine (NGOM) management area, targets for General Category incidental catch, and set-asides for the observer and research programs for fishing year 2019 and default specifications for fishing year 2020. Management measures in FW 30 include: Standard default measures. They also plan to review progress toward 2018 work items, make recommendations on 2019 scallop work priorities, and consider approaches for
