SUPPLEMENTARY INFORMATION:

Background

This National Telecommunications and Information Administration cybersecurity multistakeholder process focuses on promoting software component transparency. Most modern software is not written completely from scratch, but includes existing components, modules, and libraries from the open source and commercial software world. Modern development practices, such as code reuse, and a dynamic IT marketplace with acquisitions and mergers, make it challenging to track the use of software components. The Internet of Things compounds this phenomenon, as new organizations, enterprises, and innovators take on the role of software developer to add "smart" features or connectivity to their products. Although

the majority of libraries and components do not have known vulnerabilities, the sheer quantity of software means that some software products ship with vulnerable or out-of-date components.

Under the multistakeholder process, NTIA acts as the convener, but stakeholders drive the outcomes, determine how to scope and organize the work through subgroups or other means, and evaluate success of the process based on the extent to which the group's findings on software component transparency are implemented across the ecosystem. The first meeting of this multistakeholder process was held on July 19, 2018, in Washington, DC.¹ Stakeholders presented multiple perspectives, and identified four inter-related work streams: Understanding the Problem, Use Cases and State of Practice, Standards and Formats, and Healthcare Proof of Concept.

The main objectives of the November 6, 2018, meeting are to share progress from the working groups and hear feedback from the broader stakeholder community. Stakeholders will also discuss how the outputs of the different work streams can complement each other, and identify issues for further study. More information about stakeholders' work is available at: <https://www.ntia.doc.gov/SoftwareTransparency>.

Time and Date: NTIA will convene the next meeting of the multistakeholder process on software component transparency on November 6, 2018, from 10 a.m. to 4 p.m. Eastern Standard Time. Please refer to NTIA's website, <https://www.ntia.doc.gov/SoftwareTransparency>, for the most current information.

Place: The meeting will be held at the American Institute of Architects, 1735 New York Ave. NW, Washington, DC 20006. The location of the meeting is subject to change. Please refer to NTIA's website, <https://www.ntia.doc.gov/SoftwareTransparency>, for the most current information.

webcast or other auxiliary aids should be directed to Allan Friedman at (202) 482-4281 or afriedman@ntia.doc.gov at least seven (7) business days prior to each meeting. Needs and Uses: Section 22 of the Arms Export Control Act (22 U.S.C. 2762) requires the U.S. Government to use foreign funds, rather than U.S. appropriated funds, to purchase military equipment for foreign governments. To comply with this requirement, the Government needs to know how much to charge each country. The Government uses this information to determine how much of each country's funds to disburse to the contractor.

Responses per Respondent: Approximately 30.

The clause at 252.232-7002 requires each contractor whose contract includes FMS requirements to submit a separate progress payment request for each progress payment rate and to submit a supporting schedule that distinguishes the contract's FMS requirements from U.S. requirements.
