

Note: We have completed the for-hire operations survey and one season of the Passenger Survey. We need to complete the second season of the Passenger Survey.

II. Method of Collection

For the for hire operations, a team of students will go to the operations offices and collect the information. For the passengers, surveys will be conducted at the docks after the completion of their whale watching trip. The on-site survey will obtain information on demographic profiles, annual number of whale watching trips in the Channel Islands region, and their non-market economic use value for reductions in the risk of whale strikes. Self-addressed, postage paid mail back questionnaires will be used for importance-satisfaction ratings and whale watching trip expenditures.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection. The collection was approved three years ago but had not begun.

NOAA is mentoring student interns from the Monterey Institute for International Studies to estimate the market and non-market economic values

associated with non-consumptive recreation uses (e.g. whale watching, other wildlife observation, SCUBA diving, snorkeling, beach activities, surfing, wind-surfing, kite boarding, paddle boarding, etc.) in the Monterey Bay National Marine Sanctuary (MBNMS) for those accessing the MBNMS via “for hire” operation boats.

The required information is to conduct surveys of the for hire operations that take people out for non-consumptive recreation to obtain total use by type of activity and the spatial use by type of activity. Information will also be obtained on costs-and-earnings of the operations, knowledge, attitudes & perceptions of sanctuary management strategies and regulations, and demographic information on owner/captains and crews. Surveys will also be conducted of the passengers aboard the for hire operation boats to obtain their market and non-market economic use values for non-consumptive recreation use and how those value change with changes in natural resource attribute conditions and user characteristics. Additional information will be obtained on importance-satisfaction ratings of key natural resource attributes, facilities and services, knowledge, attitudes and perceptions of management strategies and regulations, and demographic profiles of passengers. This survey was not started during the 2015–2018 OMB approval period.

II. Method of Collection

For the for hire operations, a team of students will go to the operations offices and collect the information. For the passengers, surveys will be conducted at the docks after the completion of their trips. The on-site survey will obtain information on demographic profiles, annual number of trips in the MBNMS for non-consumptive recreation, and their non-market economic use value. Self-addressed, postage paid mail back questionnaires will be used for importance-satisfaction ratings, knowledge, attitudes and perceptions, and trip expenditures.
