NUCLEAR REGULATORY COMMISSION

[Docket No. 40-9083; NRC-2018-0242]

U.S. Army Ranges With Davy Crockett Depleted Uranium

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment application; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) issued License Amendment No. 3 to the Army. License Amendment No. 3 makes multiple changes to Source Materials License No. SUC-1596: (1) Incorporation by reference of three revised final site-specific Environmental Radiation Monitoring Plans (ERMPs); (2) incorporation by reference of the December 15, 2017, letter, clarifying sampling procedures; (3) incorporation by reference of the letter naming the license Radiation Safety Officer (RSO); (4) incorporation by reference of the letter naming the new Army licensing official; and (5) editorial changes to correct grammar, and formatting. License Amendment No. 3 was effective on the date of issuance. The Army must implement the revised final site-specific ERMPs within 3 months of the date of issuance.

DATES: November 7, 2018.

SUPPLEMENTARY INFORMATION: In a letter dated June 1, 2017 (ADAMS Accession No. ML17158B356), the Army requested an amendment to Source Materials License No. SUC-1593 (ADAMS Accession No. ML16343A164) pursuant to section 40.44 of title 10 of the *Code of Federal Regulations* (10 CFR), "Amendment of Licenses at the Request of Licensee." The Army requested to replace the three annexes to the programmatic environmental monitoring plan (ERMP) (site-specific ERMPs) with revised final versions, because the Army indicated that Figure 1-2, in each of the three site-specific ERMPs, is incorrect due to sizing/scaling errors made by the Army. The site-specific ERMPs that the Army proposed be replaced with the revised final site-specific ERMPs were the site-specific ERMPs for Fort Polk, LA, (Annex 11) (ADAMS Accession No. ML16265A225), Fort Riley, KS, (Annex 12) (ADAMS Accession No. ML16265A226) and the Pohakuloa Training Area (PTA), HI (Annex 17) (ADAMS Accession No. ML16265A231), dated September 2016. The Army also

requested a license amendment that would allow the Army to make similar future "minor changes" to site-specific ERMPs without NRC approval.

In a letter dated September 18, 2017 (ADAMS Accession No. ML17226A205), the NRC staff (staff) informed the Army that they completed their acceptance review of the application and found that the request to correct specific figure sizing/scaling errors in the identified site-specific ERMPs contains sufficient information for the staff to begin their detailed technical review. However, the staff determined that the Army's proposal to make similar future "minor changes" to site-specific ERMPs without U.S. NRC approval did not contain enough information to accept the request for detailed technical review. Also in the September 18, 2017, letter, the staff informed the Army that it would continue to process the June 1, 2017, license amendment request, to include the appropriate noticing in the **Federal Register**, without further consideration of the "minor changes" portion of the license amendment request if the Army did not provide a supplement to the amendment request within 30 days for the staff to evaluate.

On October 18, 2017, the Army informed the staff that it would not pursue the minor changes portion of its June 1, 2017 amendment request. In a letter dated November 21, 2017 (ADAMS Accession No. ML17297B156), the staff informed the Army that the NRC will not consider the "minor changes" portion of the Army's June 1, 2017, amendment application.

On December 11, 2017, a notice of an opportunity to request a hearing and to petition for leave to intervene on this licensing proceeding was published in the **Federal Register** (82 FR 58221). No requests were submitted.

On December 15, 2017, the Army submitted supplemental information (ADAMS Accession No. ML18009A456) clarifying how it conducts sediment sample collection. This submittal was a voluntary response to a NRC Petition Review Board's question about sediment sample collection raised in the March 16, 2017, 10 CFR 2.206 petition (ADAMS Accession No. ML17110A308). In a letter dated January 19, 2018 (ADAMS Accession No. ML18023A991), the Army requested that its December 15, 2017, clarification letter be included under License Condition No. 11 for License Amendment No. 3. This portion of License Amendment No. 3 is administrative. An updated **Federal Register** notice (FRN) was not required for this administrative change.

In the March 16, 2017, 10 CFR 2.206 petition, a concern was raised that the
