

system of records to that researcher solely for the purpose of carrying out that research. Directly personally identifiable respondent information, such as name and contact information, are stored separately from the rest of the data collected in this system, and are not made available as part of a research disclosure. The researcher must agree to safeguards to protect the security and confidentiality of the records disclosed from this system, consistent with Section 183 of the ESRA (20 U.S.C. 9573). Furthermore, the researcher must agree to use the information for statistical purposes only, not redisclose any data in identifiable form, and permit NCES' periodic inspection.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained in a database on NCES' or its contractors' or subcontractors' secure servers and in other secure electronic storage media. Directly personally identifiable respondent information, such as name and contact information, is stored separately from the rest of the data collected in this system.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records in the location file are indexed by a unique number assigned to each individual, which can be cross-referenced when needed with the separately stored direct personal identifiers. Records are retrieved by title of survey and the unique number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

The Department shall submit a retention and disposition schedule that covers the records contained in this system to the National Archives and Records Administration (NARA) for review. The records will not be destroyed until such time as NARA approves said schedule.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access to the records is limited to authorized personnel who are briefed regarding confidentiality of the data, are required to sign a written statement attesting to their understanding of the significance of the confidentiality requirement and penalties for non-compliance, and have received Department security clearances.

All physical access to the NCES, contractor, and subcontractor sites where this system of records is maintained, is controlled and monitored by security personnel who check each individual entering the buildings for his or her employee or visitor badge.

The computer systems employed offer a high degree of resistance to tampering and circumvention. Security systems limit data access to contract staff on a "need to know" basis, and control each individual user's ability to access and alter records within the system.

The NCES, contractor, and subcontractor employees who "maintain" (including collect, maintain, use, or disseminate) data in this system of records must comply with the requirements of the confidentiality standards under Section 183 of the ESRA (20 U.S.C. 9573).
