

disturbance and density caps, modification of habitat objectives, and application of sage-grouse lek buffers. His letter also recommended revisions to the 2019 Approved RMPA and ROD to recognize the recent changes to Utah's Conservation Plan for Greater Sage-Grouse, which creates more consistency between Utah's plan and the BLM's Approved RMPA. The State of Utah's disturbance cap in designated sage-grouse habitat was adjusted and set at three percent disturbance above their 2013 baseline, a change made to better align Utah's sage-grouse plan with the BLM's and is highlighted in the ROD. In addition to this change, Utah's plan was also updated to include a "Utah's Habitat Guidelines" table establishing habitat objectives. The BLM's Approved RMPA, Appendix B, has been updated to state that analysis determining impacts on lek persistence will be conducted in coordination with the appropriate State of Utah agency. The BLM also responded to the governor's letter by updating the ROD to document the ongoing coordination required to resolve the consistency issues he identified. In addition to updating the ROD, the BLM will present the field,

district, and monument offices with a table and other implementation materials detailing the changes in the 2019 Approved RMPA and which actions from 2015 Approved RMPA will be affected upon the signing of the ROD.
