**SUPPLEMENTARY INFORMATION:** Each year cable systems must submit royalty payments to the Register of Copyrights as required by the statutory license detailed in section 111 of the Copyright Act for the retransmission to cable subscribers of over-the-air television and radio broadcast signals. *See* 17 U.S.C. 111(d). The Copyright Royalty Judges (Judges) oversee distribution of royalties to copyright owners whose works were included in a qualifying transmission and who file a timely claim for royalties. Allocation of the royalties collected occurs in one of two ways.

In the first instance, the Judges may authorize distribution in accordance with a negotiated settlement among all claiming parties. 17 U.S.C. 111(d)(4)(A). If all claimants do not reach agreement with respect to the royalties, the Judges must conduct a proceeding to determine the distribution of any royalties that remain in controversy. 17 U.S.C. 111(d)(4)(B).

Alternatively, the Judges may, on motion of claimants and on notice to all interested parties, authorize a partial distribution of royalties, reserving on deposit sufficient funds to resolve identified disputes. 17 U.S.C. 111(d)(4)(C), 801(b)(3)(C).

On March 15, 2019, representatives of Allocation Phase claimants<sup>1</sup> filed with the Judges a motion pursuant to section 801(b)(3)(C) of the Copyright Act requesting a partial distribution amounting to 40% of the 2017 cable royalty funds on deposit. 17 U.S.C. 801(b)(3)(C). That statutory section requires that, before ruling on the motion, the Judges publish a notice in the **Federal Register** seeking responses to the motion for partial distribution to ascertain whether any claimant entitled to receive the subject royalties has a

reasonable objection to the requested distribution.

Accordingly, this Notice seeks comments from interested claimants on whether any reasonable objection exists that would preclude the distribution of 40% of the 2017 cable royalty funds to the requesting claimant representatives. Parties objecting to the partial distribution must advise the Judges of the existence and extent of all objections by the end of the comment period. The Judges will not consider any objections with respect to the partial distribution that come to their attention after the close of the comment period.

Members of the public may read the motion by accessing the Copyright Royalty Board's electronic filing and case management system at <https://app.crb.gov/> and searching for CONSOLIDATED docket number 16–CRB–0009–CD (2014–17).

Dated: April 4, 2019.

mechanical, or other technological collection techniques or other forms of information technology should be addressed to the points of contact in the **FOR FURTHER INFORMATION CONTACT** section.

**Title of Collection:** Education and Human Resources Program Monitoring Clearance.

**OMB Number:** 3145-0226.

**Type of Request:** Intent to seek approval to extend, with revisions, an information collection.

**Abstract:** The National Science Foundation (NSF) requests re-clearance of program accountability data collections that describe and track the impact of NSF funding that focuses on the Nation's science, technology, engineering, and mathematics (STEM) education and STEM workforce. NSF funds grants, contracts, and cooperative agreements to colleges, universities, and other eligible institutions, and provides graduate research fellowships to individuals in all parts of the United States and internationally.

The Directorate for Education and Human Resources (EHR), a unit within NSF, promotes rigor and vitality within the Nation's STEM education enterprise to further the development of the 21st century's STEM workforce and public scientific literacy. EHR does this through diverse projects and programs that support research, extension, outreach, and hands-on activities that service STEM learning and research at all institutional (e.g., pre-school through postdoctoral) levels in formal and informal settings; and individuals of all ages (birth and beyond). EHR also focuses on broadening participation in STEM learning and careers among United States citizens, permanent residents, and nationals, particularly those individuals traditionally underemployed in the STEM research workforce, including but not limited to women, persons with disabilities, and racial and ethnic minorities.

The scope of this information collection request will primarily cover descriptive information gathered from education and training (E&T) projects that are funded by NSF. NSF will primarily use the data from this collection for program planning, management, and audit purposes to respond to queries from the Congress, the public, NSF's external merit reviewers who serve as advisors, including Committees of Visitors

(COVs), the NSF's Office of the Inspector General, and as a basis for either internal or third-party evaluations of individual programs.

The collections will generally include three categories of descriptive data: (1) Staff and project participants (data that are also necessary to determine individual-level treatment and control groups for future third-party study or for internal evaluation); (2) project implementation characteristics (also necessary for future use to identify well-matched comparison groups); and (3) project outputs (necessary to measure baseline for pre- and post- NSF-funding-level impacts).

**Use of the Information:** This information is required for effective administration, communication, program and project monitoring and evaluation, and for measuring attainment of NSF's program, project, and strategic goals, and as identified by the President's Accountability in Government Initiative; GPRA, and the NSF's Strategic Plan. The Foundation's FY 2014–2018 Strategic Plan may be found at: <http://www.nsf.gov/pubs/2014/nsf14043/nsf14043.pdf>.

Since this collection will primarily be used for accountability and evaluation purposes, including responding to queries from COVs and other scientific experts, a census rather than sampling design typically is necessary. At the individual project level funding can be adjusted based on individual project's responses to some of the surveys. Some data collected under this collection will serve as baseline data for separate research and evaluation studies.

NSF-funded contract or grantee researchers and internal or external evaluators in part may identify control, comparison, or treatment groups for NSF's E&T portfolio using some of the descriptive data gathered through this collection to conduct well-designed, rigorous research and portfolio evaluation studies.

**Respondents:** Individuals or households, not-for-profit institutions, business or other for profit, and Federal, State, local or tribal government.

**Number of Respondents:** 2,511.

**Burden on the Public:** NSF estimates that a total reporting and recordkeeping burden of 32,698 hours will result from activities to monitor EHR STEM education programs. The calculation is shown in table 1.

TABLE 1—ANTICIPATED PROGRAMS THAT WILL COLLECT DATA ON PROJECT PROGRESS AND OUTCOMES ALONG WITH THE NUMBER OF RESPONDENTS AND BURDEN HOURS PER COLLECTION PER YEAR.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 70-0925; NRC-2019-0093]

### Cimarron Environmental Response Trust Cimarron Facility

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** License amendment application; opportunity to provide comments, request a hearing and to petition for leave to intervene.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) has received a license amendment application from the licensee, Cimarron Environmental Response Trust (CERT) for the Cimarron Facility, located in Logan County, Oklahoma. The license authorizes possession of Byproduct, Source, and Special Nuclear Material (SNM-928). CERT requested approval of its proposed Facility Decommissioning Plan (DP), Rev. 1 for the Cimarron Facility in Guthrie, Oklahoma and incorporation of the DP into its license by license amendment. The requested license amendment would also: Revise to the possession limit; change the description of the licensed site; eliminate License Conditions that are no longer applicable; and incorporate a revised Radiation Protection Program into the license. The requested license amendment is necessary for CERT to complete the remaining decommissioning activities needed for

NRC to release the Cimarron site for unrestricted use. The requested license amendment is also necessary to ultimately terminate Special Materials License SNM-928; however, license termination is a separate action that requires a separate application from CERT and a separate NRC finding that the site is suitable for release.

**DATES:** Submit comments by May 10, 2019. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received before this date. A request for a hearing or petition for leave to intervene must be filed by June 10, 2019.

**ADDRESSES:** You may submit comments by any of the following methods:
