

industry, and in assessing energy markets.

### FERC Form No. 6–Q, Quarterly Financial Report of Oil Pipeline Companies

The Commission uses the information collected in FERC Form No. 6–Q to carry out its responsibilities in implementing the statutory provisions of the ICA to include the authority to prescribe rules and regulations concerning accounts, records, and memoranda, as necessary or appropriate. Financial accounting and reporting provides necessary information concerning a company's past performance and its future prospects. Without reliable financial

statements prepared in accordance with the Commission's USofA and related regulations, it would be difficult for the Commission to accurately determine the costs that relate to a particular time period, service, or line of business.

The Commission uses data from FERC Form No. 6–Q to assist in: (1) Implementation of its financial audits and programs; (2) continuous review of the financial condition of regulated companies; (3) assessment of energy markets; (4) rate proceedings and economic analyses; and (5) research for use in litigation.

Financial information reported on the quarterly FERC Form No. 6–Q provides the Commission, as well as customers, investors and others, an important tool

to help identify emerging trends and issues affecting jurisdictional entities within the energy industry. It also provides timely disclosures of the impacts that new accounting standards, or changes in existing standards, have on jurisdictional entities, as well as the economic effects of significant transactions, events, and circumstances. The reporting of this information by jurisdictional entities assists the Commission in its analysis of profitability, efficiency, risk, and in its overall monitoring.

## II. Background

### A. Purpose of the FIFRA SAP

The FIFRA SAP serves as one of the primary scientific peer review mechanisms of EPA's Office of Chemical Safety and Pollution Prevention (OCSPP) and is structured to provide independent scientific advice, information and recommendations to the EPA Administrator on pesticides and pesticide-related issues as to the impact of regulatory actions on human health and the environment. The FIFRA SAP is a federal advisory committee established in 1975 under FIFRA that operates in accordance with requirements of the Federal Advisory Committee Act (5 U.S.C. Appendix). The FIFRA SAP is composed of a permanent panel consisting of seven members who are appointed by the EPA

Administrator from nominees provided by the National Institutes of Health (NIH) and the National Science Foundation (NSF). FIFRA established a Science Review Board (SRB) consisting of at least 60 scientists who are available to FIFRA SAP on an ad hoc basis to assist in reviews conducted by the FIFRA SAP. As a scientific peer review mechanism, the FIFRA SAP provides comments, evaluations, and recommendations to improve the effectiveness and quality of analyses made by Agency scientists. Members of FIFRA SAP are scientists who have sufficient professional qualifications, including training and experience, to provide expert advice and recommendation to the Agency.

#### B. Public Meeting

EPA-registered pesticide products are an important part of pest management programs to control invertebrate pests of public health importance including fleas, ticks, mosquitoes, and biting flies that can vector diseases to pets and humans. The Agency has multiple guidelines intended to assist in the development of appropriate protocols to test product efficacy. EPA Product Performance Test Guideline OPPTS 810.3300 Treatments to Control Pests of Humans and Pets published in March 1998. To increase clarity and consistency in efficacy testing and to include current scientific standards, the Agency is revising this product performance guideline.

The proposed guideline applies to products in any topically applied formulation, such as a spray, spot-on, collar, shampoo, or dust, if intended to be directly applied to pets for a pesticidal purpose such as to kill, repel, or control ticks, fleas, mosquitoes, and biting flies. This guideline does not apply to those products exempt from FIFRA Registration under 40 CFR 152.25, products applied to humans or livestock, or product performance testing described in other Agency guidelines. In addition to guidance for testing efficacy against fleas, ticks, mosquitoes, and biting flies, the proposed guideline also includes testing methods for evaluating efficacy under simulated environmental conditions. The Agency is seeking advice and recommendations from the SAP on scientific issues associated with the proposed revised EPA guideline. The Agency believes the current draft guideline represents the state of the science with regard to efficacy testing for these products. EPA is committed to reducing the use of animals in testing (<https://www.regulations.gov/document?D=EPA-HQ-OPP-2016-0093-0003>).

However, at this time no reliable non-animal alternatives are available to avoid the use of animals for efficacy testing of fleas, ticks, mosquitoes and biting flies. As part of the SAP, EPA is soliciting comment from the panel on approaches that may, in the future, support the replacement or reduction of animal use in efficacy testing of ectoparasitic pests on pets.

#### C. FIFRA SAP Documents and Meeting Minutes

The EPA's background paper, the supporting materials, and draft charge/questions to the FIFRA SAP will be available by mid-April 2019. In addition, a list of candidates under consideration as prospective ad hoc panelists for this meeting will be available for a 15-day public comment period by early to mid-April 2019. The Agency will provide additional background documents (e.g., the meeting agenda) as the materials become available. You may obtain electronic copies of these documents, and certain other related documents that might be available, at <http://www.regulations.gov> in docket EPA-HQ-OPP-2019-0161 and on the FIFRA SAP website at <https://www.epa.gov/sap>.

The FIFRA SAP will prepare meeting minutes summarizing its recommendations to the Agency approximately 90 days after the meeting. The meeting minutes will be posted on the FIFRA SAP website at <https://www.epa.gov/sap> or may be obtained from the OPP Docket at <http://www.regulations.gov>.
