SUPPLEMENTARY INFORMATION: FEMA's Radiological Emergency Preparedness (REP) Program coordinates the national effort to provide State, Tribal and local governments with relevant and executable planning, training, and exercise guidance and policies necessary to ensure that adequate capabilities exist to prevent, protect against, mitigate the effects of, respond to, and recover from incidents involving commercial nuclear power plants (NPPs).

The REP Program assists State, Tribal and local governments in the development and conduct of off-site REP emergency planning and preparedness activities within the emergency planning zones (EPZs) of Nuclear Regulatory Commission (NRC)-licensed commercial nuclear power facilities. Sec. 109 of the NRC Authorization Act of 1980 (Public Law 96-295) directed the NRC to establish emergency preparedness as a criterion for licensing commercial NPPs. Specifically, section 109 of Public Law 96-295 directed the NRC to establish through rulemaking, (a) standards, developed with FEMA, for the evaluation of State and local government radiological emergency planning and preparedness; and (b) a requirement that the NRC will issue operating licenses. Before issuing a license the NRC must determine that there is (i) a State or local emergency response plan compliant with the standards developed with FEMA or (ii) in the absence of such a plan, a State, local, or utility emergency response plan that provides reasonable assurance that public health and safety is not endangered by the NPP's operation. See Public Law 96-295, 109(b)(1)(A)-(B)). The NRC revised its regulations in Part

50 of Title 10 of the CFR to incorporate additional emergency preparedness requirements, including 16 planning standards for onsite and offsite emergency plans as required by PL 96–295. FEMA mirrors these 16 planning standards in part 350, specifically at 44 CFR 350.5. In the communities surrounding commercial NPPs, 44 CFR 350.5(b) directs FEMA’s REP Program to review offsite radiological emergency plans and preparedness. Approved plans and preparedness “must be determined to adequately protect the public health and safety by providing reasonable assurance that appropriate protective measures can be taken offsite in the event of a radiological emergency.” FEMA defines reasonable assurance as a determination that State, Tribal, local, and utility offsite plans and preparedness are adequate to protect public health and safety in the emergency planning areas of commercial NPPs. FEMA will consider plans, procedures, personnel, training, facilities, equipment, drills, and exercises, which in its professional judgment are important to the effective implementation of protective measures offsite in the event or any incident at a commercial NPP. FEMA will make its adequacy determination, supported by other Federal agencies, as necessary, by conducting inspections, providing Staff Assistance Visits (SAVs), organizing, conducting and reviewing training, participating in, observing and evaluating drills and exercises, and by being an engaged partner with Federal, State, Tribal, and local government officials and industry stakeholders. State, Tribal, or local government participation in offsite radiological emergency planning and preparedness is voluntary. However, participation in the REP planning and preparedness process necessitates adherence to the program requirements as set forth in 44 CFR part 350, the joint NRC/FEMA document NUREG–0645/FEMA–REP–1, Rev. 1, “Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants” (and supplements), and the REP Program Manual (RPM). If State, Tribal, or local governments choose not to participate in REP planning, 44 CFR part 352 outlines the licensee’s obligation to develop offsite plans/procedures to protect the public health and safety in accordance with the requirements in Executive Order 12657, as amended.
