The information is used to monitor the foreign country exposures of reporting institutions to determine the degree of risk in their portfolios and assess the potential risk of loss. The Country Exposure Information Report (FFIEC 009a) is a supplement to the FFIEC 009 and provides publicly available information on material foreign country exposures (all exposures to a country in excess of 1 percent of total assets or 20 percent of capital, whichever is less) of U.S. banking organizations that file the FFIEC 009 report. As part of the Country Exposure Information Report, reporting institutions also must furnish a list of countries in which they have lending exposures above 0.75 percent of total assets or 15 percent of total capital, whichever is less.
