DEPARTMENT OF ENERGY

[Case Number 2018-007; EERE-2018-BT-WAV-0011]

Energy Conservation Program: Petition for Waiver of Beghelli North America From the Department of Energy Illuminated Exit Signs Test Procedure

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of petition for waiver, and request for comments.

SUMMARY: This document announces receipt of and publishes a petition for waiver from Beghelli North America (“Beghelli”), which seeks a waiver from the U.S. Department of Energy (“DOE”) test procedure used for determining the energy consumption of specified illuminated exit sign basic models. Beghelli seeks to use an alternate test procedure to address issues involved in testing the basic models identified in its petition. Beghelli contends that the design characteristics of its combination illuminated exit signs prevent them

from being accurately tested using the currently applicable DOE test procedure. Beghelli has suggested an alternate test procedure to test and rate the Beghelli basic models specified in its petition. For the reasons discussed in this document DOE is proposing a different alternate test procedure. DOE solicits comments, data, and information concerning Beghelli’s petition, its suggested alternate test procedure, and DOE’s proposed alternate test procedure to inform its decision on Beghelli’s waiver request.

DATES: Written comments and information are requested and will be accepted on or before March 8, 2019.

SUPPLEMENTARY INFORMATION:

I. Background and Authority

The Energy Policy and Conservation Act of 1975, as amended (“EPCA”),¹ authorizes the U.S. Department of Energy (“DOE”) to regulate the energy efficiency of a number of consumer products and industrial equipment. (42 U.S.C. 6291-6317) Title III, Part B of EPCA established the Energy Conservation Program for Consumer Products Other Than Automobiles, which sets forth a variety of provisions designed to improve energy efficiency for certain types of consumer products. These products include illuminated exit signs, the focus of this document. (42 U.S.C. 6291(37); 42 U.S.C. 6295(w))

Under EPCA, DOE’s energy conservation program consists essentially of four parts: (1) Testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of EPCA include definitions (42 U.S.C. 6291), energy conservation standards (42 U.S.C. 6295), test procedures (42 U.S.C. 6293), labeling provisions (42 U.S.C. 6294), and the authority to require information and reports from manufacturers (42 U.S.C. 6296).

The Federal testing requirements consist of test procedures that manufacturers of covered products must use as the basis for: (1) Certifying to DOE that their products comply with the applicable energy conservation

¹ All references to EPCA in this document refer to the statute as amended through the EPS Improvement Act of 2017, Public Law 11-115 (January 12, 2018).
