

Identifier. Other system search filters such as last name or first name can also be used to retrieve provider records.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are destroyed 18 years after the date of the applicable letter of determination, per disposition authority number DAA-0512-2014-0004, item 2.9 (formerly N1-512-92-01, item 2). This retention schedule is media neutral (applies to all media, including paper).

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Safeguards conform to HHS Information Security and Privacy Program, <https://www.hhs.gov/ocio/securityprivacy/index.html>. Information is safeguarded in accordance with applicable laws, rules and policies, including the HHS Information Technology Security Program Handbook, all pertinent National Institutes of Standards and Technology (NIST) publications, and OMB Circular A-130, Managing Information as a Strategic Resource.

Administrative Safeguards: Access to paper and electronic records is limited to persons authorized to update, view, or maintain provider records. Authorized users include internal users such as government and contractor personnel and external users such as state partners. Internal users must attend security training and sign a Rules of Behavior, which is renewed annually. All external users must also sign a Rules of Behavior and register to receive approval to access system records. All users are given role-based access to the system on a limited need-to-know basis. Approved users' access to system records is controlled by two factor authentication. Physical and logical access to the system is removed upon termination of employment or other change in the user's role.

Technical Safeguards: Electronic records are protected from unauthorized access by encryption, intrusion detection, and firewalls. Routine system security scans are run to detect web and architecture vulnerabilities.

Physical Safeguards: Servers and other computer equipment used to process identifiable data are located in secured areas and use physical access devices (e.g., keys, locks, combinations, card readers) and/or security guards to control entries into the facility. All facilities housing HRSA information systems maintain fire suppression and detection devices/systems (e.g., sprinkler systems, handheld fire extinguishers, fixed fire hoses, and/or smoke detectors) that are activated in

the event of a fire. The same physical safeguards are utilized at the federal records center where older paper records are stored.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves in this system of records must submit a written request to the System Manager/Policy Coordinating Official at the address specified in the "System Manager" section above. The requester must verify his or her identity by providing either a notarization of the request or a written certification that the requester is who he or she claims to be and understands that the knowing and willful request for access to a record pertaining to an individual from an agency under false pretenses is a criminal offense under the Privacy Act, subject to a five thousand dollar fine. Requesters may also ask for an accounting of disclosures that have been made of their records, if any.

CONTESTING RECORD PROCEDURES:

An individual seeking to amend a record about him or her in this system of records must submit a written request to the System Manager indicated above, verify his or her identity in the same manner as is required for an access request, and reasonably identify the record and specify the information being contested, the corrective action sought, and the reasons for requesting the correction, along with any supporting documentation. The right to contest records is limited to information that is incomplete, incorrect, untimely, or irrelevant.

NOTIFICATION PROCEDURES:

An individual who wishes to know if this system of records contains records about him or her must submit a written request to the System Manager indicated above, and must verify his or her identity in the same manner as is required for an access request.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.
