

ENVIRONMENTAL PROTECTION AGENCY**[EPA-HQ-OECA-2012-0524; FRL-9993-88-OMS]****Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Stationary Combustion Turbines (Renewal)****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Stationary Combustion Turbines (EPA ICR Number 2177.07, OMB Control Number 2060-0582) to the Office of Management and Budget (OMB), for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through May 31, 2019. Public comments were previously requested, via the **Federal Register**, on May 30, 2018 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before June 24, 2019.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2012-0524, to: (1) EPA online using www.regulations.gov (our preferred method), by email to doCKET.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200

Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov, or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The New Source Performance Standards (NSPS) for Stationary Combustion Turbines (40 CFR part 60, subpart KKKK) were proposed on February 18, 2005, and promulgated on July 6, 2006. These regulations apply to new stationary combustion turbines with a heat input at peak load equal to or greater than 10.7 gigajoules (10 MMBtu) per hour, based on the higher heating value of the fuel. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart KKKK.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities: Stationary combustion turbines.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart KKKK).

Estimated number of respondents: 730 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 76,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,670,000 (per year), which includes \$0 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is an adjustment increase in burden hours

and costs for both the respondents and the Agency as currently identified in the OMB Inventory of Approved Burdens. The increase is not due to any program changes. The increase is due to an adjustment in the number of new or modified sources. This ICR assumes the respondent universe subject to the regulation has continued to grow at a constant rate since the last ICR renewal. The increase in the number of respondents also results in an increase in the number of responses.

Courtney Kerwin,

Director, Regulatory Support Division.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Chemical Preparations Industry (40 CFR 63, subpart BBBBBBB) were proposed on August 5, 2009, and promulgated on December 30, 2009. These regulations apply to both existing and new chemical preparation facilities that conduct the mixing, milling, blending or extruding of industrial chemicals and that are area sources of hazardous air pollutants (HAPs). Area sources are classified as sources that emit less than 10 tons per year of a single HAP or less than 25 tons per year of any combination of HAPs. New facilities include those that commenced construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart BBBBBBB.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is

inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities:

Existing and new chemical preparation facilities that conduct the mixing, milling, blending or extruding of industrial chemicals and that are area sources of hazardous air pollutants (HAPs).

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart BBBBBBB).

Estimated number of respondents: 26 (total).

Frequency of response: Initially, annually and semiannually.

Total estimated burden: 2,210 hours (per year). Burden is defined as 5 CFR 1320.3(b).

Total estimated cost: \$252,000 (per year), which includes \$390 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low, negative or non-existent, so there is no significant change in the overall burden.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[Regional Docket No. II-2016-3; FRL-9993-76-Region 2]

Clean Air Act Operating Permit Program; Petitions on State Operating Permit for Hyland Landfill

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final Order on Petitions on Clean Air Act title V operating permit.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an Order dated April 10, 2019 denying two Petitions, each dated March 21, 2016, from Gudrun Scott and from Frederick Sinclair on behalf of the Concerned Citizens of Allegany County (CCAC). The Petitions relate to a Clean Air Act (CAA) title V operating permit issued by the New York State Department of

Environmental Conservation (NYSDEC) to Hyland Facility Associates for the Hyland Landfill located in Allegany County, New York.

ADDRESSES: The EPA requests that you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section to view copies of the final Order, the Petitions, and other supporting information. You may review copies of the final Order, the Petitions, and other supporting information at the EPA Region 2 Office, 290 Broadway, 25th Floor, New York, New York 10007-1866.

You may view the hard copies Monday through Friday, from 9:00 a.m. to 3:00 p.m., excluding federal holidays. If you wish to examine these documents, you should make an appointment at least 24 hours before the visiting day. Additionally, the final Order and Petitions are available electronically at: <https://www.epa.gov/title-v-operating-permits/title-v-petition-database>.

FOR FURTHER INFORMATION CONTACT:

Suilin Chan, EPA Region 2, 212-637-4019, Chan.Suilin@epa.gov.

SUPPLEMENTARY INFORMATION: The CAA affords the EPA a 45-day period to review and object to, as appropriate, operating permits proposed by state permitting authorities under title V of the CAA. Section 505(b)(2) of the CAA authorizes any person to petition the EPA Administrator to object to a title V operating permit within 60 days after the expiration of the EPA's 45-day review period if the EPA has not objected on its own initiative. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the state, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or unless the grounds for the issues arose after this period.

The EPA received Petitions from Gudrun Scott and from Frederick Sinclair on behalf of the CCAC, each dated March 21, 2016, relating to the issuance of operating Permit No. 9-0232-00003/00012, issued by the NYSDEC to the Hyland Landfill, in Allegany County, New York. The Order more fully summarizes the issues raised in the Petitions. The Scott Petition expresses various concerns related to Hyland Landfill's acceptance of drill cuttings and other drilling wastes from natural gas drilling operations in Pennsylvania, and the possibility that the deposition of these wastes will ultimately result in air emissions of radon from the Hyland Landfill. The
