Amendment of Class E Airspace; Monroe, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Class E airspace extending upward from 700 feet above the surface in Monroe-Walton County Airport, Monroe, GA, to accommodate airspace reconfiguration due to the decommissioning of the Monroe non-directional radio beacon

and cancellation of the NDB approach. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations at this airport. This action also updates the geographic coordinates of this airport.

DATES: Effective 0901 UTC, August 15, 2019. The Director of the Federal Register approves this incorporation by reference action under Title 1 Code of Federal Regulations part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends Class E airspace extending upward from 700 feet above the surface for Monroe-Walton County Airport, Monroe, GA, due to the decommissioning of the Monroe non-directional radio beacon and cancellation of the NDB approach.

History

The FAA published a notice of proposed rulemaking in the **Federal Register** (84 FR 13575, April 5, 2019) for Docket No. FAA–2019–0206 to amend Class E airspace extending upward from 700 feet above the surface for Monroe-Walton County Airport, Monroe, GA, due to the decommissioning of the Monroe NDB and cancellation of the NDB approach.

Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class E airspace designations are published in Paragraph 6005 of FAA Order 7400.11C, dated August 13, 2018, and effective September 15, 2018, which is incorporated by reference in 14 CFR part 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11C, Airspace Designations and Reporting Points, dated August 13, 2018, and effective September 15, 2018. FAA Order 7400.11C is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11C lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Rule

This amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 amends Class E airspace extending upward from 700 feet above the surface at Monroe-Walton County Airport, Monroe, GA, by increasing the airport radius to 6.9 miles (from 6.3 miles), and eliminating the southwest extension of the airport to accommodate airspace reconfiguration due to the decommissioning of the Monroe NDB and cancellation of the NDB approach. Also, the geographic coordinates of the airport are adjusted to coincide with the FAA's aeronautical database. These changes are necessary for continued safety and management of IFR operations at this airport.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT

Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Background

This document contains amendments to 26 CFR part 1 under section 337(d) of the Internal Revenue Code (Code).

In *General Utilities & Operating Co. v. Helvering*, 296 U.S. 200 (1935), the Supreme Court held that corporations generally could distribute appreciated property to their shareholders without the recognition of any corporate-level gain (*General Utilities* doctrine). Beginning with legislation in 1969 and culminating in the Tax Reform Act of 1986, Public Law 99–514 (100 Stat. 2085), Congress repealed the *General Utilities* doctrine by enacting section 336(a) to apply gain and loss recognition
