Request for New Information

To ensure that a 5-year review is complete and based on the best available scientific and commercial information, we request new information from all sources. See **What Information Do We Consider in Our Review?** for specific criteria. If you submit information, please support it with documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

If you wish to provide information for any species listed in the table, please submit your comments and materials to the appropriate contact in **ADDRESSES**.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Comments and materials received will be available for public inspection, by appointment, during normal business hours at the offices to which the comments are submitted.

Agency Information Collection Activities; Economic Contribution of Federal Investments in Restoration of Degraded, Damaged, or Destroyed Ecosystems

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Geological Survey (USGS) are proposing to renew an information collection.

DATES: Interested persons are invited to submit comments on or before August 12, 2019.

ADDRESSES: Send your comments on this information collection request (ICR)

to U.S. Geological Survey, Information Collections Officer, by email to gs-info_collections@usgs.gov. Please reference OMB Control Number 1028-0107 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Rudy Schuster by email at schusterr@usgs.gov, or by telephone at (970) 226-9165.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of the USGS; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the USGS enhance the quality, utility, and clarity of the information to be collected; and (5) how might the USGS minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request

to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Federal investments in ecosystem restoration restore injured natural resources and improve the health and resiliency of terrestrial, freshwater, and marine ecosystems. These investments also generate business activity and create jobs. The Economic Impacts of Ecosystem Restoration project aims to increase the availability of information on the costs and activities associated with ecosystem restoration and to gauge the economic effects of these investments to local economies. Researchers with the U.S. Geological Survey (USGS) and the DOI Office of Policy Analysis are conducting this information collection at the request of the Natural Resource Damage Assessment (NRDA) Restoration Program. The NRDA Restoration Program is weighing the pros and cons of collecting restoration cost data as part of contractor reporting requirements for restoration projects associated with NRDA cases. The collection described under this request is designed to refine potential expenditure questions prior to developing contractor reporting requirements. The project comprises a series of case studies that quantify the economic impacts of restoration projects. The case studies include examples of collaboratively funded and managed projects to restore a wide range of degraded, damaged, or destroyed ecosystems. Project methods include the collection of primary expenditure data and economic input/output modeling. Results from the first phase of case studies are available in a 2016 USGS report entitled, “Estimating the economic impacts of ecosystem restoration—methods and case studies.” This second phase of case studies aims to refine the survey methods and to develop and test a web-based data collection form that would enable broader collection of project expenditure data.

Title of Collection: Economic Contribution of Federal Investments in Restoration of Degraded, Damaged, or Destroyed Ecosystems.

OMB Control Number: 1028–0107.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Restoration project managers working on selected case study restoration projects; this includes project managers from state and local government, non-profits, and the private sector.

Total Estimated Number of Annual Respondents: We expect to do up to 10 case studies per year, and all of these case studies will have Federal project managers.

Total Estimated Number of Annual Responses: 10.

Estimated Completion Time per Response: We estimate it will take approximately 3.5 hours per person to complete the survey, including correspondence time.

Total Estimated Number of Annual Burden Hours: 35 hours.

Respondent's Obligation: Voluntary.

Frequency of Collection: One time.

Total Estimated Annual Nonhour Burden Cost: There are no “non-hour cost” burdens associated with this collection of information.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Rudolph Schuster,

Fort Collins Science Center, Chief, Social & Economic Analysis Branch.
