Consultation

A detailed assessment of the human remains was made by the Department of Anthropology, Southern Methodist University professional staff in consultation with representatives of the Caddo Nation of Oklahoma and the Wichita and Affiliated Tribes (Wichita, Keechi, Waco & Tawakonie), Oklahoma.

History and Description of the Remains

During 1965 and 1966, human remains representing, at minimum, three individuals were removed from the two sites in Cooke County, TX. Burial 1 is from the Chicken House Site (X41CO6/41CO156). The one individual, a female 18–25 years old, was found on the floor of a cache pit. She had been placed in a semi-flexed position, and lay on her back, facing the northeast. The hips and knees were flexed, and the legs turned toward the left. The arms were placed down at the side, and were bent at the elbows, with ulnae and radii parallel to the humeri, and the hands next to the shoulders. The bones indicate signs of disease. The skull, left wrist, and left hand were missing at the time of excavation. No known individuals were identified. Although artifacts were found in the cache pit, there were no funerary objects associated with this burial.

Two burials were recovered from unnamed site X41CO3 during a survey and soil profiling. The first burial was located on the surface, and consists of two skull fragments and one charred unidentifiable bone fragment. The second burial was also located on the surface, and consists of a single human tooth and one unidentifiable bone fragment. No known individuals were

identified. No associated funerary objects are present for either of these two burials.

Both sites are dated from A.D. 850 to 1000, and fit the Plains Woodland Pattern, but they also begin to approach the Plains Village Pattern. Culturally, the people who occupied the sites were Caddoan.
