Title of Collection: IES Research Training Program Surveys.

OMB Control Number: 1850-0873.

Type of Review: An extension of an existing information collection.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 580.

Total Estimated Number of Annual Burden Hours: 197.

Abstract: The surveys are for participants in the fellowship research training programs and the non-fellowship research training programs funded by Institute of Education Sciences (IES). IES's fellowship programs include predoctoral training under the National Center for Education Research (NCER) and postdoctoral training under NCER and the National Center for Special Education Research (NCSE). These programs provide universities support to provide training in education research and special education research to graduate students (predoctoral program) and postdoctoral fellows. IES also supports non-fellowship research training through its current programs, e.g., NCER's Methods Research Training program and NCER's Undergraduate Pathways program. IES would like to collect satisfaction information from the participants in these programs and other similar training programs funded through NCER or NCSE grant programs. The results of the surveys will be used both to improve the training programs as well as to provide information on the programs to the participants, policymakers, practitioners, and the general public. All information released to the public will be in aggregate so that no one program or training group can be distinguished.

Such exports require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On June 28, 2019, DOE received an application from AL&P for authorization to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities. The Applicant states that its "business is a licensed retail electric provider (REP) in the purchase and sale of wholesale electricity, capacity, and ancillary services at market-based rates in the Electric Reliability Council of Texas, Inc. (ERCOT) to Industrial, Medium and Small Commercial, and

Residential customers throughout the Texas ERCOT deregulated market."

The Application states that it "does not own or control any electric power generation or transmission facilities and does not have a franchised electric power service area." The electric energy that the Applicant proposes to export to Mexico over international electric transmission facilities would be surplus energy purchased from third parties such as electric utilities and other suppliers within the United States. The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.
