

houses test positive requiring plan review and modifications and that it takes 10 hours to complete this work. Thus, the total annual burden for prevention plan review and modifications in the event of a positive test result is calculated to be 3,310 hours (331 records × 10 hours).

We estimate that chick and pullet procurement records under § 118.10(a)(2) is kept roughly once annually per layer house basis. We estimate that 4,731 layer houses maintain 1 record each and that it takes approximately 0.5 hour per recordkeeping. Thus, the total annual burden for chick and pullet procurement recordkeeping is calculated to be 2,366 hours (4,731 records × 0.5 hour).

We estimate that rodent and other pest control records under § 118.10(a)(3)(ii) and biosecurity records under § 118.10(a)(3)(i) are kept weekly on a per layer house basis. We assume that 4,731 layer houses maintain a weekly record under each provision. Thus, we estimate 9,462 recordkeepers maintain 52 records each for a total of 492,024 records. We estimate a recordkeeping burden of 0.5 hours per record for a total of 246,012 burden hours (492,024 records × 0.5 hour).

New prevention plan design required by § 118.10(a)(1) is only undertaken by new farms and records are kept on a per farm basis. We estimate that there are 350 new farm registrations annually, and we assume that this reflects 350 new farms requiring prevention plan

design. This is an increase from our previous estimate based on new registrations received. We estimate that it takes 20 hours to complete this work. Thus, the total annual burden for prevention plan design is calculated to be 7,000 hours (350 records × 20 hours).

Cleaning and disinfection recordkeeping under § 118.10(a)(3)(iii) needs to be performed every time a house tests positive. We estimate that 331 layer houses test positive requiring 1 record each and that it takes approximately 0.5 hour per recordkeeping. Thus, the total annual burden for cleaning and disinfection recordkeeping in the event of a positive test result is calculated to be 166 hours (331 records × 0.5 hour).

TABLE 2—ESTIMATED ANNUAL REPORTING BURDEN ¹

Description and 21 CFR section	Form	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Registrations or Updates, § 118.11.	FDA 3733 ²	350	1	350	2.3	805
Cancellations, § 118.11	FDA 3733	30	1	30	1	30
Total	835

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

² The term "Form FDA 3733" refers to both the paper version of the form and the electronic system known as the Shell Egg Producer Registration Module, which is available at <https://www.access.fda.gov> per § 118.11(b)(1).

This estimate is based on the average number of new shell egg producer registrations and cancellations received in the past 3 years under § 118.11. We estimate that we will receive an average of 350 registrations or updates per year over the next 3 years and that it takes the average farm 2.3 hours to register, taking into account that some respondents completing the registration may not have readily available internet access. Thus, the total annual burden for new shell egg producer registrations or updates is calculated to be 805 hours (350 respondents × 2.3 hours).

We estimate that we will receive 30 cancellations per year over the next 3 years and that cancelling a registration, on average, requires a burden of 1 hour, taking into account that some respondents may not have readily available internet access. Thus, the total annual burden for cancelling shell egg producer registrations is calculated to be 30 hours (30 cancellations × 1 hour).

We have increased our burden estimate for the information collection based on an increase in annual new farm registrations.

Dated: July 10, 2019.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Population Affairs; Awards Unsolicited Proposal for the CFDA Number: 93.974

AGENCY: Office of Population Affairs, Office of the Assistant Secretary for Health, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The Office of Population Affairs (OPA) announces the award of a single-source grant in response to an unsolicited proposal from the University of Northern Colorado, Greeley, Colorado. The proposal submitted was not solicited either formally or informally by any federal government official.

FOR FURTHER INFORMATION CONTACT: Diane Foley at diane.foley@hhs.gov or by telephone at 240-453-8200.

SUPPLEMENTARY INFORMATION:

Recipient: University of Northern Colorado, Greeley, Colorado.

Purpose of the Award: The purpose of this grant is to expand the knowledge base regarding cessation strategies that adolescents and young adults use to maintain their reproductive health. It will provide valuable data on how family planning services can incorporate technology and cessation counseling strategies in primary care medical clinics and other clinic workflows, including Title X clinics.

Amount of Award: \$499,385 in Federal Fiscal Year (FFY) 2019 funds and estimated \$500,000 in FFY 2020 funds subject to the enactment of appropriations and availability of funds.

Project Period: July 15, 2019–July 14, 2021.

OPA performed an objective review of the unsolicited proposal from the University of Northern Colorado to expand and evaluate the OPTIONS for Integrated Health program. This proposal builds on a previous study, which is the only study in existence that has scientifically demonstrated how the Transtheoretical Model of Health Behavior Change (Prochaska & Velicer) works with sexually active adolescents and young adults. This cutting edge research identified the population of

adolescents and young adults most ready for behavior change including cessation from sexual activity. Based on an external and internal review of the proposal, OPA determined that it has merit.

The University of Northern Colorado and the proposed Principle Investigator have experience expanding scientific knowledge on harm-reduction/cessation strategies adolescents and young adults use to maintain their reproductive health. They will further broaden knowledge in harm-reduction/cessation strategies by further testing an innovative digital health technology in underserved adolescent/clinics in counties experiencing high levels of unintended pregnancy and STI rates.

This award is being made non-competitively because there is no current, pending, or planned funding opportunity announcement under which this proposal could compete.

Legislative Authority: Title X of the Public Health Service Act, SEC. 1004 [300a–2].

Dated: July 8, 2019.

Diane Foley,

Deputy Assistant Secretary for Population Affairs.

National Institute of Environmental Health Sciences; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Environmental Health Sciences Special Emphasis Panel; Mechanism for Time-Sensitive Research Opportunities in Environmental Health Sciences.

Date: July 30, 2019.

Time: 2:00 p.m. to 3:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute of Environmental Health Sciences, Keystone Building, 530 Davis Drive, Durham, NC 27709 (Virtual Meeting).

Contact Person: Leroy Worth, Ph.D., Scientific Review Officer, Scientific Review Branch, Division of Extramural Research and Training, Nat. Institute of Environmental Health Sciences, P.O. Box 12233, MD EC–30/ Room 3171, Research Triangle Park, NC 27709, (919) 541–0670, worth@niehs.nih.gov.
