SUPPLEMENTARY INFORMATION: This ICR seeks approval under the PRA for revisions to the Consumer Expenditure Surveys: Quarterly Interview and Diary. The Consumer Expenditure Surveys are used to gather information on expenditures, income, and other related subjects. These data are used to periodically update the national Consumer Price Index. In addition the data are used by a variety of researchers in academia, government agencies, and the private sector. The data are collected from a national probability sample of households designed to represent the total civilian non-institutional population. In order to accommodate Large Scale Feasibility Online Diary test, several modifications will be made to production procedures and collection including the addition of two question relating to internet access, implementation of an online Diary, and the addition of debriefing questions. The study will obtain an expected 1,200 completed cases. The large sample size is needed in order to perform statistically significant analysis of any differences in data quality between the online diaries and production (paper) diaries prior to full production implementation. The study sample will be further divided into two groups, with one group receiving a \$5 incentive. The CPI program is changing its source of outlet frame information from the Telephone Point of Purchase Survey (TPOPS) to the CEQ and CED surveys. As a result, the sample size for the CE surveys will increase. The BLS conducts the CE Surveys under the authority of

Title 29, Section 2 of the United States Code.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB, under the PRA, approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1220-0050. The current approval is scheduled to expire on December 31, 2021; however, the DOL notes that existing information collection requirements submitted to the OMB will receive a month-to-month extension while they undergo review. New requirements would only take effect upon OMB approval. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on March 14, 2019 (84 FR 9383).

SUPPLEMENTARY INFORMATION:

I. Introduction

Under section 101 of the Federal Mine Safety and Health Act of 1977, a mine operator may petition and the Secretary of Labor (Secretary) may modify the

application of a mandatory safety standard to that mine if the Secretary determines that: (1) An alternative method exists that will guarantee no less protection for the miners affected than that provided by the standard; or (2) the application of the standard will result in a diminution of safety to the affected miners.

MSHA bases the final decision on the petitioner's statements, any comments and information submitted by interested persons, and a field investigation of the conditions at the mine. In some instances, MSHA may approve a petition for modification on the condition that the mine operator complies with other requirements noted in the decision.
