The licensee's proposal states that auxiliary spillway will be removed, and that the spillway area will be modified by rock splitting and blasting to lower the sill to 2,305 ft above mean sea level to accommodate 6 Fusegates. This includes construction of a new access road to facilitate the construction activity. It is proposed that resulting spoil material will be placed in the reservoir per the requirements of the U.S. Army Corps of Engineers Section 404 individual permit and the Section 401 Water Quality Certification conditions from the North Carolina Division of Water Resource. The licensee is proposing to implement mitigation measures to protect Indiana bats and northern long-eared bats that were required by U.S. Fish and Wildlife Service. Furthermore, the licensee plans to close the public access boat ramp for the duration of the drawdown, and plans to repave the parking lot and remove sediment from the launch area during the closure.
