ADDRESSES: Dr. Pamela Endzweig, Director of Collections, Museum of Natural and Cultural History, 1224 University of Oregon, Eugene, OR 97403-1224, telephone (541) 346-5120, email endzweig@uoregon.edu.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains and associated funerary objects under the control of the University of Oregon Museum of Natural and Cultural History, Eugene, OR. The human remains and associated funerary object were removed from Purdy Mound at Bob Creek, Lane County, OR.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains was made by the University of Oregon Museum of Natural and Cultural History professional staff in consultation with representatives of the Confederated Tribes of Siletz Indians of Oregon (previously listed as the Confederated Tribes of the Siletz Reservation); Confederated Tribes of the Coos, Lower Umpqua and Siuslaw Indians; Confederated Tribes of the Grand Ronde Community of Oregon; and the Coquille Indian Tribe (previously listed as the Coquille Tribe

of Oregon), hereafter referred to as "The Consulted Tribes."

History and Description of the Remains

In 1950, human remains representing, at minimum, one individual were removed from Purdy Mound at Bob Creek in Lane County, OR. The human remains were removed by a private party and were donated to the museum in 1950 (acc. # 100LC). They belong to an adult male (cat. # 11-262). No known individuals were identified. The two associated funerary objects are one partial bone club and fragments of one elk maxillary.

The human remains are reasonably believed to be of Native American ancestry based on their archeological context. Historical documents, ethnographic sources, and oral history indicate that the Bob Creek site lies near the territorial boundary between the Alsea and the Siuslaw peoples. Both cultural groups have occupied the region since pre-contact times. Based on information obtained through consultation, the human remains are identified as Alsea. The Alsea are members or the Confederated Tribes of Siletz Indians of Oregon.

Determinations Made by the University of Oregon Museum of Natural and Cultural History

Officials of the University of Oregon Museum of Natural and Cultural History have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(3)(A), the two objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Confederated Tribes of Siletz Indians of Oregon (previously listed as the Confederated Tribes of the Siletz Reservation).

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Dr. Pamela Endzweig, Director of Collections, Museum of Natural and Cultural History, 1224
