D. Public Comment

A 60-day notice published in the **Federal Register** at 84 FR 17830 on April 26, 2019. One comment was received. The analysis of the public comment is summarized as follows:

a. Summary of the Collection Activity is not Accurate

Comment: The respondent expressed that the summary of the collection activity is not accurate, because it only gives two examples of the purposes of the collection.

Response: After additional review of the collection activity requirement, it is deemed no change is necessary because the summary of the information collection adequately identifies the required information.

b. Low Burden Estimate

Comment: The respondent states that the burden estimate seems low for 16 private security companies, each giving 5 responses which takes a small amount of time to complete.

Response: Based on discussions with subject matter experts, it has been concluded that the estimated hours per response were underestimated. The response time has been increased from .167 to .5. This increase will more accurately reflect the burden estimate.

c. Reporting Form

Comment: The respondent indicated that the actual form should be approved along with the information collection summary to provide sufficient details to meet the reporting requirements.

Response: After further review, the reporting requirements detailed in the information collection summary are deemed to provide sufficient details to meet the objectives of FAR clause 52.225–26. No further revisions are necessary because the information collection summary adequately identifies the reporting requirements.
